POLES DEPLORE ASSASSINATION OF SOVIET ENVOY

Government Doing Everything to Fulfill the Requirements of Justice

ROYALIST ARRESTS HAVE BEEN MADE

Warsaw Police Inquiring Into the Possibilities of a Monarchist Plot

WARSAW, Poland, June 9 (AP)-Maxim Litvinoff, acting Soviet For-Commissar, sent a note of thanks today to Mr. Zaleski, Polish Foreign Minister, for the Polish Government's expressions of sympathy over the assassination of Mr. Volkoff, Russian Minister to Poland after he had been shot by a young Russian student in Warsaw.

The police authorities have taken drastic steps to determine whether the assassination of Peter Volkoff, Soviet envoy at Warsaw, was part of a Russian monarchist plot. Voikoff's assassin was a young Russian student of Vilna. The Polish police conducted searches and made arrests among the monarchist colonies in

both Warsaw and Vilna, five arrests at the capital and 29 at Vilna. The Russian newspaper, Vilna Novaía Rossia, which issued a spe-cial edition recommending subscrip-tions for the murderer, was

a protest against the assassination at Warsaw on Tuesday of the Soviet Minister to Poland.

From afternoon until a late hour last night the streets leading to the Polish Embassy were filled with rators, but a heavy guard o special Russian troops kept them away from the building.

The bombing of a hall in which the Leningrad Communist Discussion Club was meeting on Tuesday night, was followed vesterday by the blowing up of a trolley car in which a lieutenant of the Polish intelligence service suspected of aspionage, was taken to Minsk from the Po-Opansky, vice-chief of the state political police, and two of his assistants were killed by the ex-plosion of a bomb which had been places on the track, while the prisoner was seriously injured. In the bombing of the Communist Club 26 persons, among them 10 young was seriously injured. In

Relation of the States to **Economic Interests to Be** Discussed in Michigan

AUGUSTA, Me., June 9 (Special)coincident with the announ that Michigan has appropriated \$25,-2000 to entertain the annual Governors' Conference on July 25, 25 and 27, was the statement today by Gov. Ralph O. Brewster, conference chairman, that the theme of the 1927 conference will be "Relation of States to Economic Interests."

This conference theme will subdivide itself into discussions of flood

vide itself into discussions of flood and agricultural relief and transporand agricultural relief and transpor-tation with special reference to the development of an American mer-chant marine. The Michigan gather-ing already gives promise of being the largest in recent years because of the increasing interest. The sum appropriated is evidence of the scope on which Michigan is approaching which Michigan is approaching while in Chicago and vicinity last

ernors' Conference, Governor Brew-ster met Theodore Burton of Cleve-land, national representative and former United States Senator. He is president of the American Peace So-ciety which is now arranging to ob-serve the 150th anniversary of the birth of William Ladd, citizen of Maine, who conceived the ideas that are guiding the present movement in behalf of international peace. A representative of this society

Position as Creditor Does Not Permit Export Balance

will have to accustom themselves to import more foreign goods and service than it exports of its own, asserted Charles E. Mitchell, president of the National City Bank of New

"We must remember," Mr. Mitchell said, "that the money borrowed here has not been taken out of the country. It has been spent here in purchases. So heavy, indeed, has been the advance of money this way that not only have foreign merchants been forced to expend all of the proceeds of foreign loans here, but they have had to send large quantities of gold to discharge their abroad, our foreign customers would have had to curtail purchases here or send more gold, the one course meaning loss of foreign markets to American production, the threatening us with inflation.

Interest Paid in Goods "We are now a creditor nation and in the long run balances of creditors have to be settled in goods and services. The process of piling

up credits abroad cannot go on forever. Already the annual interest and sinking fund requirements on our foreign lendings are estimated at close to \$1,000,000.000, and the time is approaching when new lend-ing will do little more that cover such charges. Inevitably the American people will have to accustom themselves to an import halance of

Warrens of Forest Grove, secretary-treasurer

Mr. Mitchell deplored the excessive competition of American bankers for loans abroad, and declared that "American business and political leaders should be thinking constructively and in bigger terms than ever as to how American capital can be induced to stay at home by opportunity to earn and to serve."

He said he believes the greatest for the highway is one of the highway, 16 miles long, is one of the first objectives. Steps have already been taken looking to the planting of hawthorne trees on both sides of the highway the entire distance between the two cities.

railroad field. He commented that, sightly posts now in use. Several however great the railroad industry's progress, the inevitable growth of the country demands "the most modern, efficient transportation plant in the world, and it is not in sight,"

Prohibition: Its Economic and Industrial Effects

EARLY POPULARITY OF NEAR-BEER FADED AS PROHIBITION ADVANCED

Year Ending June 30, 1926, Showed Brewery Output Was 150,522,077 Gallons as Against 285,825,830 Gallons During Same Period in 1921

By PROFESSOR HERMAN FELDMAN

Of the Amos Tuck School of Administration and Finance, Dartmouth College. Article XI. Has Near-Beer Taken the Place of Beer? One of the great speculations before prohibition was what people would drink instead of beer. Some thought that since the brewing in-

dustry catered to thirst, most of the brewing plants and equipment would soon be busy making other forms of drink. It should be noted that, of the alcoholic beverages consumed in this country before prohibition, beer was over 85 per cent of the total volume, distilled spirits about 10 per cent, and wine less than 5 per cent. Hence, a study in the change of consumption will be confined, for the

Near-Beer Seemed Logical Successor

present, to substitutes for beer.

Near-beer was regarded in many quarters as the logical successor to real beer. Of course, there were not lacking those who pooh-poohed the idea that a vigorous American people would ever take to near-beer, but there were others who declared with even more confidence that it would be the brewers' salvation. This more optimistic group had ample reason to be hopeful. Near-beer was not a new product at the time of national prohibition. Breweries had experimented with its sale for decades, in the localities where real beer had been prohibited by state laws or local option. And the success with such products in pre-prohibition days lent every encouragement to the belief that prohibition would not be such a blow to the brewing industry as some imagined.

Experiences of Anheuser-Busch

Consider, for example, the striking experience of the Anheuser-Busch Company. As early as 1916 the company had prepared for the possibilities of prohibition by bringing out a non-alcoholic beer, called Bevo. It became popular over night. We have it direct from the firm that "until prohibition came, the corporation never caught up with the demand for this non-alcoholic beer," and three cars of Bevo were shipped for every four cars of beer! Noting the tremendous popularity of the non-al-coholic cereal beverage, the company prepared for the added business; and, when national prohibition arrived, it was ready with other non-alcoholic cereal beverages, manufactured through the de-alcoholization

Events during the first six months of prohibition were even more wildly encouraging. The demand for the non-alcoholic beers was little less than remarkable, and Mr. Busch, son of the founder of the firm, and his directors had visions of a volume of business only slightly smaller than before prohibition.

Within six months after prohibition became effective, Mr. Busch and his directors had a rather rude awakening—as did many other brewers. The sales of near-beer began to decline radically. The company's pres ant production of near-beer is only 10 per cent of its former output of real beer. The reasons for its failure to make a go of near-beer are also the reasons why the other brewers did not make a go of it. To these reasons we shall return in a moment. First, we shall present certain facts and explain how near-beer is made.

Near-Beer Consumption Since Prohibition We have obtained the facts of near-beer production in two ways. First, we have the official figures of the United States Bureau of Interna Revenue for near-beer production for the country as a whole, presented in the table below. Second, we have made a survey of the output of a might have given them an experience different from that of the trade as a whole. The statistics on this may, therefore, be regarded as rather

NEAR BEER PRODUCTION FROM 1921 TO 1926 Year ending June 30 285, 825, 830 Gallons 1922 196. 781, 781 Gelt. 163. 329. 982 Gals. 151. 606, 909 Gals. 158, 676, 417 Gals . 150, 522. 077 Gals.

Here we see a decline in 1926 to little more than half of the production of near-beer in 1921. The proportion this bears to the former output of real beer will be considered later in the article, and is also significant

Output of the Large Brewers Replies from individual brewers, as obtained in my own survey show that the Pittsburgh Brewing Company, making approximately 700,000 barrels of beer in 1919, had an output of 21,000 barrels of nearbeer in 1926. Christian Feigenspan of Newark, N. J., made 482,377 barrels of beer in 1919, and only 12,690 of near-beer in 1926. The John Hauck Company of Cincinnati, producing over 280,000 barrels of real beer in 1918, sold only 13,000 barrels of near-beer in 1925. The Fred Miller Brewing Company of Milwaukee, Wis., has an annual sale of 20,000 barrels of near-beer, as against over 400,000 barrels of real beer in 1919. We have already cited the experience of An-

The table below gives the information for the country's chief breweries more fully:

PRODUCTION OF NEAR-BEER BY SOME OF THE COUNTRY'S LARGEST BREWERIES IN 1826. COMPARED TO PRODUCTION OF REAL BEER BY THE SAME CONCERNS IN 1918-1919 (Near-beer Produced in 1925-26, as Compared to Amount of Real Beer in period around 1918-19)

Location of plant of plant

Chicago, Ill

Of the twenty-five largest brewers shown on the list, the proportion of near-beer produced to former output of real beer ranges in twentythree instances from 2 per cent to 33 per cent; one company makes just as much as before, and one twice as much.

In 1914, the country's production of real beer was 2.051.873.663 gallons, in addition to which some near-beer was also produced, of which no separate record seems to be available. In 1926, the output of nearbeer was only 150,522,077 gallons, or 7 per cent of the 1914 production

sary first to make real beer; then, by reheating to vaporize the alcoho

How Near-Beer Is Made Few people know how near-beer is actually made. Near-beer is a further step in the making of real beer. To obtain near-beer, it is neces

in excess of one-half of 1 per cent until near-beer is produced. This re-heating adds considerably to the cost, aside from the fact that the process requires the installation of new equipment. A much larger proportion of the beverage is put up in bottles, so that the rearrangement of plant facilities becomes necessary. One plant, reporting on the cost of removing parts of its keg department machinery, to the bottling department, shows that this involves no small expenditure. In addition, manufacturing costs are higher in this industry today

DRY LAW LINKED TO STATE RIGHTS BY MR. MCADOO

Declares Wet States Are Ones Violating South's Traditional Policy

MACON, Ga., June 9-The South, by supporting the prohibition amendment, was consistent with its historical advocacy of States' rights. William G. McAdoo declared here in addressing the graduating class of Mercer University.

He said the Eighteenth Amendment gave to the National Government, as well as the states, a mandate to enforce "the prohibition law by appro-priate legislation."

In other words, with respect to prohibition enforcement, he said, the Constitution establishes no division or distribution of powers between the Federal Government and the state governments, but gives to both co-extensive grant of power. Points to Unfair Criticism

The address of the former Secre-

"In those sections of the country where opposition to the prohibition amendment is strongest there has een unfair and misleading criti-

for men to take them up and claim them who have no conception of lawful liberty, whose idea of liberty is freedom of the individual to prey upon the community and to deny the right of the community to protect itself against its unfit members.

Observes Civil Liberty "It is perhaps natural that the dorine of civil liberty should be thus nisunderstood by those who have failed to grasp its great tradition. It is equally natural that in the same way the historic southern doctrine of states' rights should be twisted and perverted to an alien use.

ment argues a fundamental misun-

ATLANTIC FLIERS PLAN REGULAR OCEAN SERVICE

Chamberlin and Levine Declare Operations Can Be Started Within a Year

LARGER USEFUL LOAD IS TERMED NECESSITY

Pilot Studies German Metal Airplanes-Aviators Are Received by Chancellor

By Wireless

BERLIN, June 9-Clarence D. Chamberlin and Charles A. Levine already are planning the organization of a transatlantic air service which they believe may be opened in a year's time, Mr. Levine told American correspondents in a interview here. He said he is willing to put not

less than \$2,000,000 into this project and that they now have an airplane of suitable type in prospect. It will be a multimotored ship, but the number of engines is not yet de-cided. What is needed in aviation— especially so for an transationtic especially so far as transatlantic passenger service is concerned— Chamberlin said, are airplanes capa-

Studies German Airplanes Chamberlin believes the German metal airplanes are very good for short distances but for such only. The Germans admit this frankly but blame the Allies for this back-wardness since by restrictions on German aviation, only recently re-moved, the Germans were prevented from building stronger engines or

machines carrying great loads. They hope to remedy this now.

No changes will be made in the Columbia here except for the in-sertion of bolts in the landing carriage, since Chamberlin's machine had an arrangement—now no longer needed—for dropping the landing carriage in case of a forced landing on the sea. The monoplane, in housed in one of the Tempelho hangars among countless German metal airplanes, is attracting the utmost attention from German pilots

and airplane experts. Crowd Invents Song

Meanwhile a tireless crowd is still waiting in front of the American Embassy to see the airmen, singing from time to time Berlin's latest popular song, invented by the crowd: "Chamberlin, Chamberlin, crowd: "Chamberlin, Chamberlin, wir wollen dich sehen sonst meussen wir ins kino gehen." ("Chamberlin, Chamberlin, we want to see you, otherwise we must go to the movies to see you").

The two American airmen are still

waterproof jacket as well as a white shirt and black tie acquired at Kott-bus; Levine his blue suit with white stripes. In this apparel they visited President von Hindenburg and later Dr. Wilhelm Marx, the Chancellor who went out to the staircase to meet them and then sat between them at tea with Gustav Stresemann, the Foreign Minister, and Jacob G.

dor, at his table. The American pilots will fly June 12 to Munich, where they will stay the ground as you see it today. This great place is his imagination crystophic to the continue to Vienna, whence they return next week to meet their wives here. Levine is willing to fly back from London to New York if Cham-berlin wishes. Though the winds may be less favorable, this is com-pensated by shorter distance, he said. He also said they never expected such a hearty welcome as they received here.

Chamberlin Planned to Drop Landing Gear If Forced Down BERLIN, June 9 (A)-Clarence BERLIN, June 9 (P)—Clarence Chamberlin, pilot of the transatlantic monoplane Columbia, told the American newspaper men what he would have done had the engine failed or had he, for any other reason, been forced to descend on the ocean.

"In the first place," he said, "we had the landing gear so adjusted that we could have dropped it quickly. Had not we done this, we should have turned turtle the minute we street.

turned turtle the minute we struck the water.
"Secondly, I planned to let out all our fuel through a valve at the bot-tom of the tank, and then close the valve again, the tank, filled with air, would then have kept us affoat in-definitely, provided the storm was not too bad and the waves too high." As to the mileage covered in the flight, Chamberlin said it was practically impossible to determine exactly, as "the instruments for registering the number of revolutions (of the engine) from which distance can be calculated cannot allow for the variable of the variable

engine) from which distance can be calculated cannot allow for the velocity of the wind—therefore all estimates must needs be guesswork."

He declined to divulge for the present what periods of his flight were the most difficult. Asked whether at any time he and Levine were in serious danger, he replied: "Yes, but never so bad that we thought we would have to give up."

To the question: "Was this between America and Ireland, or after you passed the British Isles?" he reflected a long time, and finally

which I am not at liberty for the present to tell."

Discussing German aviation, the American pilot said: "We were frankly surprised to see so few small flying fields. We have a thousand of them in America, while here there are only the official fields of the Luft Hansa (German Air League), so far as we have been able to learn. Also, private planes here seem to be few, while in America private flying is widely developed. On the other hand, the Germans have developed commercial passenger service in a manner unknown in America."

He expressed doubt whether allmetal planes, such as are prevalent in Germany, were superior to machines with wooden frames for the wings. "We can re-cover our wings are not divided any longer by the

chines with wooden frames for the wings. "We can re-cover our wings with cloth from time to time, which makes them practically new, while once the metal is worn out, you must build a new plane," he said to the German correspondents.

The transatlantic pilot does not think that a nonstop flight around the world is out of the realm of possibility, but that it is a long way off. "That is taking in a lot of space," he laughingly replied when questioned as to the feasibility of such an attempt. "We would have to have a

attempt. "We would have to have a million or two dollars to play with to arrange for a flight covering more than 25,000 miles. Money and mot-ors are what is needed, but I do not for a nonstop round-the-world flight for some time.

Although motor vibration broke the indicator on the earth inductor compass of the Columbia soon after the start from Rosevelt Field start from Roosevelt Field, mberlin said he was able to Yarmouth, giving him his bearings before soaring out over the Atlantic.

Compasses Read Differently "After the first hundred miles," he said, "the earth inductor compass—our main one—began reading differently from the magnetic compass and at 200 miles it became useless. We were then only over Cape Cod, but decided to continue, using only the small magnetic compass. "That was just before we started

over the 250-mile water jump to Nova Scotia. We hit Nova Scotia "on

The competitive rules of the N. A.
A. and of the Federation Aeronautique Internationale will govern the

Airplanes competing may start anywhere on the North American continent and must finish at the John Rodgers airport four miles west of Honolulu, Seaplanes will be required to finish in Pearl Harbor eight miles west of Honolulu

The fliers competing must follow established steamer lanes on the Great Circle courses between Ha-waii and mainland ports.

Five more fliers have unofficially entered the proposed flight by in-forming the citizens' flight committee of their intention to compete.

The new entries are Everett C. Winings and Alfred E. Teall, of In-Winings and Alfred E. Teall, of Indianapolis, Ind.; Lieut. Harold L. Zufall and Sergt. W. S. Williams of St. Louis, Mo., who plans a round-

Press Makes Unusual Plans

to 'Cover' Lindbergh Welcome WASHINGTON(P)-Probably neve before in history have Americal press associations and newspaper made such elaborate arrangement for reporting an event as they have for "covering" the return to this country of Col. Charles A. Lindbergh and his official reception by Pres ent Coolidge.

Long before the Memphis reacher

the Virginia Capes an army of jour-nalists, feature writers and just plain reporters will swing into ac-Light all vehicles at 8:50 p. m. tion, with its ranks augmenting rapidly as the cruiser passes up the Potomac and delivers the flier at the Washington Navy Yard.

The vanguard of this army will fly 100 miles to sea on naval airplanes to meet the Memphis and then wing their way back to land to report the reception of the flier by his fellow aviators of the army and navy. Still others will speed out into the Atlantic in destroyers to add their output to the grist of millions of words which for more than 60 hours will test the capacity of a great portion of the country's net-

work of telegraph and telephone Lindbergh Boulevard Named CLEVELAND, June 9 (Special)-Cleveland's airport will be connected to the city by Lindbergh Boulevard,

has just been announced. Lindbergh Boulevard, named in honor of Col. Charles A. Lindbergh, New York-to-Paris filer, will be composed of the present Berea Road and Trieskett Road, which is in reality a continuance thoroughfare to the

down-town section. Increased business and importance of the airport has made Lindbergh Boulevard one of the city's most heavily traveled thoroughfares and

ton, he will invite Governors of all mittee secretary to the air tour comthe New England states to join with him in the official welcome.

He said that on behalf of the New England states he proposes to present Colonel Lindbergh a bronze trophy, emblematic of his flight through the air from the United States to France. The design or the sculptor have not been selected.

In thick escretary to the air tour committee, together with clerical assistance needed for the proper handling of the details of the local visit of the SANCTION ON CONTRACT has been changed to June 29, one day earlier than originally planned. This is due to decision of the directors of the tour that only one stop be made acculptor have not been selected.

A New England Affair

A New England Affair

Official co-operation of the Municipal Air Board has been offered the committee by Gardiner H. Fiske, vice-chairman. Assistance of the Boston chapter of the National Aeronautic Association is offered by its gas at the rate of 33 cents a thousand president, Theodore G. Holcombe. cubic feet. The aviation committee of the State Department of the American Legion has been co-operating through Capt. R. F. Raymond Jr., its chairman. The Aero Club of New England has joined the list, through offers to co-operate from its secretary, William C. Hill. This united action assures the air tour committee of

practically unimous support of avia-tion interests in Massachusetts. Invitations to other groups in New England who are interested in com-mercial aviation are to be sent out. and from all present indications it seems that the visit of the air tour to Boston will be the outstanding commercial event thus far in the history of the Boston Airport, ac-cording to the aviation committee. The tour will start June 27, going rom Detroit to Buffalo, Geneva

LAKEHURST, N. J. (AP)-Maj. for such a continued stretch in presenting the addresses and description of the national capital's reception of the young New York-to-Paris filer to America's radio audience of 30,000,000 persons. The program will start at 12 noon, the time of Colonel Lindbergh's arrival at Washington, and will close at 11 p. m. that night.

LAKEHURST, N. J. (A)—Maj. George H. Stott, of the British Royal Air Force, visiting the naval air station here, announced he was commissioned to locate sites for moorgram will start at 12 noon, the time of Colonel Lindbergh's arrival at Several 5,000,000-cubic-foot airships for such service were now under construction in England. construction in England.

OSWEGO, N. Y. (Special)—Shipping from the upper lake ports to New York by Lake Ontario and the New York State Barge Canal promises to be carried on in greater ume this year than ever, according

to indications. The new type Diesel engine-driven motor vessels are reported to be meeting the demands for lakes and canal craft. New York cargoes are being carried to Ontario ports, while grain is the principal re-consign-

DEVICE TO SHOW DRIFT IS NEXT

Foresaw Atlantic Flights "In 1913 I realized the time would come when transatlantic flights would be possible. Lord Northcliffe consulted me on the subject, and I told him it was a matter of time until such flights would be made. As the result he offered a prize of \$25,000 for the first flight, which was

won in 1919 by Brown and Alcock.
"The one big problem which must be overcome now, to make trans-atlantic flights reasonably safe, is development of a drift indicator, which will show pilots their course when they are in the clouds or sur-rounded by fog.
"It is possible to keep a course

now, if land can be seen or waves are visible. If land is out of sight or the ocean is absolutely calm, it is very difficult to know if you are on your course. In a flight of 16 or 18 hours, as in going across the Atlantic, it is possible to be blown 400 or 500 miles off course, without knowing it.

"Tribute to American Engineering "Aviation has taken greater strides in the last five years than it ever did before. The greatest wonder is the development of the motors to a point where they will run for days at a stretch, covering 4000 miles without a stop. This is all the more wonderful when you consider that a railroad locomotive has to be overhauled every 200 or

QUATRIEME AU

Direct from Dublin Comes this Collection of

Old Irish Glass

To those who trace their far away beginnings to "The Singing Isle" this rare and intimate collection of homely treasures will prove of touching interest ... Old glass, of all inanimate things, keens most sweetly the whimsical charm of Ireland.

And what more vividly expresses the life of any people than the chairs and tables in and around which they have sat in joy and sorrow for a hundred years or more?

We have been most fortunate in gathering together such an artistic and representative group of rare and beautiful exponents of a period when it was Ireland's privilege to create objects of a deep and inimitable beauty.

Rare Pieces of Waterford and Cork Glass

The tinged glory of old Waterford pieces, marvelously fashioned in the designs so typical of the period . . . and pieces of exquisitely cut Cork glass of the distinguishing outlines that mark them as unmistakably old.

It is a very beautiful collection, including:

One pair of lovely old Cork Glass Jugs, 1780. One Old Waterford Jug, 1780. Old Waterford Butter Cooler, 1780. Pair Early Cork Bowls, 1780. Three quaint Waterford Honey Pots, 1780. Pair finely cut Cork Dishes, 1780. Delicately Cut Boat Shape Waterford Bowl, 1780. 12 Cork Finger Bowls, double lipped, 1780. Early Waterford Orange Bowl, rare, 1780. Three Pairs Cork Decanters, 1800. Two Boat Shape Bowls on Pedestals, soft and beautiful, 1780. One Boat Shape Bowl, turnover type, 1780.

The Greatest Name in Rubber

He walked the streets in downpouring rain in a strange garment of rubberized cloth. He met the jeers of the world with a faith that neither disaster nor seeming disgrace could conquer. He laid upon the altar of his work all the dear things of life-health, family, friends, fortune, happiness.

He was cast into prison for debt. He felt himself "appointed of God."

He discovered the vulcanization of rubber. His name was Charles Goodyear.

N the immense and farflung industrial structure that is Goodyear today, an army of workers labors to enlarge Charles Goodyear's discovery. In cities that he never saw-quite possibly of which he

could not even dream—and in an enterprise he did not found, his spirit abides where his name finds greatest honor. With every passing year, the name of Goodyear rises

higher, clearer.

Deservedly the greatest name in rubber in the beginning, through the work of the man, it is today no less deservedly the greatest name in rubber through the work of the institution which followed the path he pioneered.

The name Goodyear is greatest in invention. Look through the annals of the rubber industry's achievements, and on every important page for a quarter-century you will find record of Goodyear the institution's contribution to the art. Goodyear invented the present straight-side tire.

Goodyear perfected the principle of cord tire construction underlying the high-mileage performance of automobile

Goodyear ingenuity fashioned the machines necessary to the production of this new construction. Goodyear devised the All-Weather Tread, for maximum

Goodyear pioneered the successful pneumatic cord truck tire.

Goodyear originated the Plant Analysis Plan of specifying rubber mechanical goods to the uses of industry. Goodyear provided the indispensable rubber equipment for aeronautics in America, and itself established record

after record in air navigation. Goodyear developed SUPERTWIST, the extraelastic, extra-durable cord fabric essential to the modern low-pressure tire.

Goodyear has just now announced the tractive, slow-wearing new Goodyear balloon tire with the new-type All-Weather Tread.

The name Goodyear is greatest in

The measure of value in rubber may accurately be gauged by volume of sales, sustained public demand being the evidence of merit. More people ride on Goodyear Tires than on any other kind.

More people walk on Goodyear rubber heels than on any other kind.

More Goodyear rubber conveyor belting is used in industry than any other kind.

More Goodyear rubber equipment is supplied to commercial aviation and for national aeronautical defense than any other kind. More Goodyear Tires - many millions more - have been

made and placed in the service of motorists than any other

More rubber is used by Goodyear - nearly one-seventh of all the crude rubber produced annually on the earth, almost 50% more than is used by any other manufacturer.

The name Goodyear is greatest in service. There is in the Goodyear business method a fixed principle of the greatest service to the greatest number. With the same care that it builds into its products the greatest possible value, Goodyear has provided the means

It has covered the world with a network of branches, depots and dealer service stations for the prompt supply and expert servicing of Goodyear wares.

to help users get all that value out.

It has pledged its selected retail outlets to give the skilled assistance to owners that results in the enjoyment of the last ounce of usefulness built into the Goodyear product.

The name Goodyear is greatest in usefulness. It is a fair statement to say that none of Goodyear's success has come to Goodyear unearned.

This is a young company—eager, alert, forward-looking—one of the youngest although it is the greatest rubber company of the world.

It has come along no royal road in its march to decisive leadership, but often through trial and travail like that which Charles Goodyear himself endured. But it has had his conquering spirit in its heart. And it has had the devoted service of thou-sands on thousands of loyal men who

respond to that spirit. And it has had the trust and good-will of the millions of people who have tested its work and word and found them worthy.

It will keep all these, because it knows whereof they spring.

In the beginning, by force of discovery, Goodyear was the greatest name in rubber. By force of usefulness, to its own and to all people, Goodyear is the greatest name in rubber today.

4cat breweries. The secretary of the tion writes: "In a number of brewing forced to the wall disposed of their new people, and in turn these plants of bootleggers. The latter, using their make and sell real beer. The volume of manufacturers.'

charge of publicity and investigation for the ay, has so interestingly revealed the trials and rid's largest brewery in its indisputably honest timate trade that we quote his letter:

orporation's own traveling representatives, and dealers, it learned that the entire country was with products prohibited by the prohibition law. A number of smaller breweries changed hands, for confraction of their original value, and the new found it easy to make arrangements for their illegal in partnership with politicians—on a profit-sharing sis, of course. This soon grew to such enormous proportions that the sale of lawful cereal beverages was practically killed. The largest Chicago brewery was driven into bankruptcy trying to follow a policy similar to our own, and many of the other larger breweries of the United States, whose officials undertook to co-operate with the Federal Government in the impartial enforcent of the law, met a similar fate. And that is when the writer of this letter came into the picture. I was employed by Mr. Busch to co-operate with the Federal Government to get a fair administration of the law for the protection of lawful business, and devoted almost two years' time to that effort. This co-operation was undertaken upon the invitation of the United States Commissioner of Internal Revenue, then the chief prohibition enforcement offi-

Illustrations of this type of complaint will demonstrate its gravity. A Pennsylvania brewer claims that "the near-beer proposition has amounted to practically nothing. This is due to the fact that we are located a short distance from the Canadian border, which makes it very convenient for the smuggling of high-powered beer and ale from Canada. In addition to this, there is a large available supply of spiked beer (near-beer to which alcohol has been added)." A Detroit brewer asserts that: "We still manufacture small quantities of beer, but the production and consumption has gone down to about 5 per cent or less of our 1919 production, owing to the fact that great quantities of Canadian malt liqours are coming across the river at Detroit daily, without being mo-lested by the prohibition officials." Another brewer claims that the market is seasonal or irregular because it varies with the seriousness of law enforcement at any particular time.

Prohibition Officials Now More Actively Suppressing Real Beer Production

Encouragement has come, however, in the strengthening of the arm of the Government through the establishment, in 1926, of a new brewery unit, which appears to be taking up the matter of violations in all sincerity. The nominal tax now imposed on cereal beverages makes it possible to investigate a brewery without a search warrant. From many quarters in the trade, high praise for the recent activities of the brewery unit at Washington has been expressed, and the secretary of the United States Brewers' Association, in a letter to the writer, claims that some good results of the greater pressure of the Government are already becoming manifest.

Home brewing of beer is also a factor, and with this prohibition officials will not be able to cope very successfully. The only hope here is competition from the legitimate industry as explained below.

Brewers Themselves Partly Responsible

that real beer would soon be legitimate again, and did not take nearbeer seriously enough. It seems that the brewery industry did itself a great deal of damage immediately after prohibition by flooding the market with cheap and tasteless near-beers, whose odor alone was often repellent. Public confidence was lost. Some of the brewers have confided to the author their belief that if the industry had concentrated on producing a palatable product of high quality, the habit of beer drinking might have been retained by many more people, and new converts won among total abstainers.

One large New York brewer puts it as follows: "Had the brewers immediately upon the advent of prohibition pooled their efforts and money for the launching of a well-thought-out advertising and educational campaign on the advantages and high qualities of near-beer products, we perhaps would not be suffering such small sales. Prohibition has caused most people to lose their taste for fine alcoholic products, having become accustomed to drinking bootleg beers, whiskys, etc., all of which are of a far inferior grade."

Some Brewers Highly Successful With Near-Beer

Not all of the brewers have fared badly under prohibition, and those which have done well attribute it to causes that are significant. In presenting the results of our survey of large breweries, it was stated that one firm is at 100 per cent production, and that one other has actually doubled its output! Nevertheless, near-beer is not beer, and it alone will probably never approach the former volume of production of real

Brewerles, Brewery Workers and Bartenders Since Prohibition

While acts of legislation are continually affecting the prosperity of one industry or another, no law passed in this country since the abo-lition of slavery attacked so vast an investment of tangible property as did the Volstead Act. The United States Census of Manufactures credited the breweries with a capital investment of \$792,914,000 in 1914 The Bureau of Internal Revenue listed 1392 breweries that year. By 1918 the number was reduced to 1092, and the final blows were delivered by war-time prohibition and the Volstead Act.

It is of considerable economic interest to know what has happened

of by other industries. This is not the case. Prohibition has had the not-unexpected result of reducing some of the breweries to junk, and made it difficult for some of the workers to adjust themselves to other The favorable side of the picture is the success of the more capable

and fortunate minority in readapting their business to new conditions, and also the fact that a good deal of the property made available through the closing of saloons was secured at a bargain by other industries, serving as a subsidy to many concerns requiring industrial

to this huge aggregation of plants during the seven-year period for

adjustment since 1919. To arrive at a general picture, some plants were visited and the survey rounded out by questionnaires addressed to the country's largest brewers. The chief locals of the various unions

of brewery workers and bartenders were also written to or visited. We should like to be able to report the good news that through some miracle all the huge plant and equipment was profitably converted to other uses without waste, and the workmen all better off or taken care

Peculiarities of Brewery Property

Certain inherent characteristics of brewery property made it apparent even hefore prohibition that the chances of profitable conversion to other purposes was not to be the experience of many of the plants. Tall buildings, with huge storage cellars of impenetrable walls, containing high vaulted chambers to accommodate enormous sized tanks but having small windows so as to keep out light: uneven floors of cement; specialized equipment almost useless for other purposes; often a location inconvenient for other businesses-it was inevitable that adaptation to other lines would be a serious problem.

The possibility of converting brewery property was the subject of investigations even before prohibition by the War Industries Board, the artment of Agriculture, the United States Chamber of Commerce and by engineers. Many of the ideas developed proved successful; did not. The chief uses to which brewery property has been put will now be considered.

Near-Beer, Soft Drinks, Confectionery and Ice Cream

With war-time prohibition, there was a veritable scramble on the part of the brewers to enter into the manufacture of soft drinks, luxury foods such as ice cream and candy, cheese, yeast, strups and dairy products, and similar items. In 1921, the Beverage Journal carried the results of a survey which showed that 667 former breweries were manufacturing non-intoxicating beverages, of which 431 made beverages other than near-beer. Some of the breweries have found one or more of the new products profitable, but others lost a great deal of money because they entered these fields without thoroughly studying the market. Too many breweries and others were playing the same nunches.

Anheuser-Busch has been notably successful in ice-cream production. In the company's branches located at New York. New Orleans and Oklahoma City, a million gallons a year are made. Some breweries are manufacturing cider, sirups and other fruit juices; and other breweries are condensing milk, making edible vegetable oils, egg powder, commercial feedstuffs, and have taken up a variety of other dairy and general food products. The Pabst Brewing Company of Milwaukee makes cheese and has parceled itself out to a dozen uses, ranging from a tire plant to a garage.

Ice-Making and Cold Storage

One of the uses to which a brewery was most favorably adapted was the manufacture of ice, due to the fact that brewers always had to manufacture a certain amount for their own use. The refrigeration facilities have been an undoubted asset, for upward of 150 breweries, and perhaps 200, are said to have entered this field. When the expansion of the ice-making equipment was justified by local conditions and the steady growth of population, the breweries found this profitable.

Another use to which brewery property seemed eminently fit was conversion into cold storage plants. In at least forty instances, an outwas found for part or all of a brewery plant in this way, and & satisfactory business built up. But in others, difficulties were encountered, because some products sent to cold storage plants must be kept at temperatures lower than that for which breweries were equipped or insulated. Those who did not wish to engage in reconstruction of their plants limited themselves to the rougher classes of goods, or became general warehouses. A good deal has depended on conditions in the vicinity and on the part of the city in which the brewery was

Other Industries Profit by Available Property

Quite a few brewers preferred to get out of the business. They took out their salable equipment and shipped it where it could be disposed of-in some cases even to China. Others waited, and were caught between the millstones of a tremendous over-expansion of plant facilities remaining in many war industries during 1917-1919, and the excess of space released by the depression beginning in the fall of 1920. It is obvious that under these conditions many of these properties have been available for sale at bargain rates to industries which could use them. That is what has occurred, and is the most favorable aspect of what in the main, resulted in making much real estate and equipment

The Extraordinary Case of Anheuser-Busch

The coming-through of the Anheuser-Busch Company makes a fascinating story, marking one of the epoch-making achievements of versatile management. The problem of adaptation to the new conditions and of converting brewery property into other uses presented itself in its most magnified aspect to this company, the largest lager beer brewery in the world, with a plant which in St. Louis alone approximated 142 acres, and an investment in tangible assets throughout the country valued in excess of \$50,000,000.

ald be noted, however, that unlike most other brewers, it was a highly diversified organization, integrating among its plants and business interests coal mines, glass manufacturing units, railroads, manufacturing rights for Diesel engines (of which many were built for the country during the war), a wood-working shop, a plant for manufac-turing wagons, and an extensive business in feeds for poultry and live stock. Hence, the firm had acquired experience in a great many lines and other advantages which made its case exceptional.

Using as their central idea the basic fact that primarily the firm wa designed to convert grain into other products, several other new lines were projected, each in some measure germane to this basic activity, such as a malt extract to lighten, enlarge and sweeten bread, sold in large quantities to bakers; a liquid food tonic having a malt hase, sold widely by druggists; yeast; a variety of corn products, and feeds for

From Brewery Wagons to Truck Bodies

Because of its huge output, requiring in earlier days a large number of wagons in its central plant and in the numerous branches throughout the country, the Anheuser-Busch Company had for years conducted its own plant in St. Louis for manufacturing these wagons. Hence, states Mr. Busch, "it was natural and not very hard to change from wagon to truck bodies."

The company specializes on bodies for motorbuses and for trucks used in the delivery of ice and perishable food products requiring refrigeration in transit, and this is a distinctly profitable department and growing rapidly. A cabinet was also developed for refrigerating ice cream in bulk, by what is called a new principle, which has filled

such a need that the producing capacity of the wood-working depart-

ment has been taxed to the limit and sometimes has been oversold.

The company has a large number of branch properties throughout the country. In every instance the attempt has been to put the plant to that use which local conditions suggested as promising, cold storage, ice-making, and the production of ice cream being three of the principal uses. Not all the equipment and space made vacant by the company's strict adherence to the letter of the law, has been put to use, although the company spent \$18,000,000 to make the various alterations and establish the new lines. Therefore, its facilities have been leased to other companies for use as storage, light manufacturing, and similar purposes

These herculean efforts have brought results. During the first three years heavy losses were sustained, and only during the fourth did the extra volume of business meet the cost. In 1924, the firm turned the corner and began to make profits. These have since been substantial and have allowed it to resume dividends. Mr. August A. Busch gives the encouraging news that he expects that by 1936, it not before, the former volume of business will not only be reached, but exceeded!

The Skilled Brewery Worker Under Prohibition Like many other movements, prohibition has made some workers bear the brunt of the change, who in their youth had entered what was regarded as a lifetime occupation. To the skilled brewers, who had been apprenticed in this work and who had never been in any other trade, prohibition was a real blow. The reduced need for them may be seen in the decline of the union membership from about 62,000 in

1917 to less than 18,000 in 1926. These reductions became serious with war-time prohibition. Many of the men were out of employment for months; some for years. While there were numerous instances of successful readjustment, and some are better off because of the change, there is no question that some of the older and less adjustable types have suffered a good deal. Quite a few who have found jobs work at salaries much lower than they had been accustomed to getting as expert brewers.

The Bartending Profession Since Prohibition

To hear one of the versatile business agents speak of the "bartender's art," the decadence of bartending in this country is the loss of "a profession." In a fashionable saloon, a true "mixologist" had to know all the varieties and brands of liquors, be an affable, respectful conversationalist, a tactful salesman, and yet be a man not too awkward with a broomhandle or a gun, as the situation demanded. What has happened to the men of this outstanding occupation?

There are still a few thousand members who dispense soft drinks at dance halls, entertainments and similar pisces, but they are only 15 per cent or less of the number formerly following the trade. The more adaptable men have gone into other trades. The less scrupulous are working in speak-easies. Some are waiters. Bartenders have separate locals, but are combined nationally with waiters and cooks in one hotel workers' and bartenders' union which, in 1916, had 59,000 members. By 1923 the number had dropped to 38,500 members, due chiefly to the dispersion of bartenders, but also to some reduction in the number of

Interesting experiences of attempts to find places for the men are reported by union agents to whom letters were addressed. One in a large New York local interviewed states that when prohibition came he tried to get some of the bartenders who were thrown out of jobs to take positions in soda fountains. He made a dicker with Liggett's drug stores and promised to supply them with the very best men who had

been in the finest clubs. On the whoie, this proved a failure. The men who had been ten or fifteen years at fine bars could not adjust themselves to the kind of trade the soda fountains had. The one thing that all complained of most vociferously was having to deal "with fussy women who changed their minds four or five times." And the mixing of fountain drinks was a new process to them. Some of them took up hard labor of various

types in preference to working at soda fountains, and many have made the change permanently. Bartenders have separate locals, but are combined nationally with vaiters and cooks in one hotel workers' and bartenders' union which, in 1916, had 59,000 members. By 1923 the number had dropped to 38,500 members, due chiefly to the dispersion of bartenders but also to some reduction in the number of waiters. For the passing of Delmon Churchill's, Reisenweber's and similar places in New York, or Edelweiss Gardens, Bismark Gardens, the North American Restaurant and others in Chicago, marked the decline of luxurious dining and reduced the need for the skilled waiters forming the backbone of the organized trade. Many more girls are used as waitresses than before, partly due to the fact that liquor is no longer served but also because cafeterias, tea rooms and chain restaurants proportionately occupy a larger place

in the country's food service.

The Bottle Workers To attempt to trace the effects of prohibition on the various industries affected by prohibition would be a huge task. It would, in all probability, lead us to the conclusion that many industries depending for their business on the established demand from breweries and distilleries lost a good part of their market and had to make it up in other directions, and the workers were similarly diverted to other trades. We shall content ourselves with mention of one industry closely allied,

that of bottle making. Bottle blowing, one of the oldest of the skilled industries in America, was at one time a mouth and hand process. In 1907, the peak year, the Glass Bottle Blowers Association had a membership of about 11,000 journeymen and 2000 apprentices. This represents the peak, be cause a machine process had been perfected a few years before and was rapidly displacing skilled workers. Only an enormous increase in beverage consumption might have enabled the occupation to hold its own. Prohibition, of course, brought the opposite result. The com-

bination of increased use of machinery with prohibition has the reduced the amount of work considerably, many firms baving left the business and others suffered a reduction of output.

The secretary of the Blowers Union states that the membership today is around 6000, but points out that the men who quit the trade have not fared badly. He states that the piecework system under on the blower worked trained him to be an exceptionally fast workman, and that as a result, he has not had much trouble in securing employment. The men have taken up ail kinds of new activities, and are not reported to have had much difficulty in readjusting themselves

NOTE: In the last paragraph of Article 10 of this series appeared the statement that between July 1, 1914, and June, 1918, the amount of beer sold dropped from 66,189,473 barrels to 50,266,216 gallons. The word gallons should have been barrels. The correction was made in the Anal edition

BRITISH UNEASY OVER ALBANIAN NOTE TO LEAGUE

Intervention of Geneva Not Desired-Need Seen to Replace Agreement

By Wireless from Monitor Burcau via Postal Telegraph from Halifax

LONDON, June 9-The Albanian placing the facts of the latest League of Nations has given rise to a feeling of embarrassment in Brit-lah diplomatic circles where the intervention of Geneva is not desired representative of The Christian cience Monitor learns. For this reaon the British authorities stress the fact that Albania has not actually appealed to the League, but has notified the Secretary-Gen-

Downing Street, therefore, hopes the Council will not be called in as a mediator when it meets Monday next, but that the question will be left to the three countries mainly concerned—Albania, Jugoslavia and Italy—to settle between themselves.

Britain's wish to eliminate the League is understood to be caused by the belief that Italy strongly rents Geneva interference. Moreover Britain, France and Japan all set their seal to the document dated Nov. 9, 1921, undertaking "in case of threats against the integrity or independence, both territorial and eco-nomic, of Albania" that the task of restoring Albania's freedom should be confined to Italy. In view of the fact that the Ital-

ins managed to secure a dominat-ing position in Albania's economic life with the right, under certain contingencies, to take over the man-agement of Albanian customs the three powers concerned will be placed in a difficult position if the subject comes before the League. Obviously they could not recommend that the task of turning Italy out should be confided to an alleged

usurper.
In the opinion of many observers, therefore, the time has come to relace the 1921 agreement by some less one-sided undertaking.

The Foreign Office, however, does

DRY LAW LINKED TO STATE RIGHTS

(Continued from Page 1)

derstanding of the historic doctrine of States' Rights.

Allocation of Responsibility "The historic doctrine of State's rights, stated in simple words, is that ours is a Government where some powers are granted to the Federal Government, and the remaining powers of Government are reserved to the States. The Federal Government must not exercise powers which are not committed to it by the Constitution and must

therefore not presume to exercise powers which the Constitution reserves to the States. With respect to prohibition en-rement, the Constitution establishes no division or distribution of nowers between the Federal Governgives to both a co-extensive grant of power. How can the doctrine of states' rights be applicable in such a situation, where the Constitution draws no line between state and federal power, and where, consequently, there can be no question of the Fed-

forcing the prohibition amendment by federal action is not assuming powers which under the Constitu-tion belong to the States. It is ex-

ment. The Constitution does not raise the question as to which authority should act. Federal authority of other members of the individuals are impaired when he is not protected against the lawless freedom of other members of the control of the of the co ity should act. Federal author-ity or state authority, but demands that both shall act. "The wording of the Eighteenth

Amendment is such that if the states do not care to witness an active

One Lady to Another --

And the other replied, "Why, my dear-I buy almost all my dresses at Bailey's Department for Grown-Ups."

"But I thought Bailey's was a children's store."

The other smiled. "So it is-but-they have a floor especially for us-, my dear, the prices are most reasonable"-

And so-one lady tells another-

campaign of prohibition enforcement carried on by the Federal Government within their own borders, they have it in their power to avoid it.

"The states have precisely the same power of enforcement as the Federal Government. If for any reason they feel that the enforcement activities of the Federal Government would be objectionable all the they would be objectionable, all that they have to do is to effectively enforce the amendment themselves. This would reduce federal activity to the minimum. This is what the amend-

ment contemplates When States Neglect Duty

"The power of the Federal Government needs to be brought into play within the borders of a State on any considerable scale only when that State is neglecting to perform the affirmative duties of enforcement, which the Constitution conment which the Constitution con-templa es that it shall perform. Ex-tension of federal activity is made necessary only by those states which have a warmer affection for the liquor traffic than for the Constitution. In so far as the question of States' rights is involved, it is therefore thes. latter States which are the enemies of States' rights and are doing their utmost to break down the principle of local self-

government government.

"The Constitution contemplates that prohibition enforcement shall be largely in the hands of the states. If the spirit of this provision is lived up to, no question of Federal centralization arises.

"Federal activity is the product "Federal activity is the product of the deliberate refusal of certain States to co-operate in the Nation-wide suppression of the liquor traffic by the joint action of the

"It is non-co-operation by certain states in a nation-wide movement which, on the one hand, thus cre-ates the necessity for federal action, and, on the other, prevents reliance

in such states upon the principle of local enforcement Co-operation for Freedom

"Just as individual freedom can exist only in a state of civil society where all individuals co-operate to where all individuals co-operate to protect the freedom of each, so states' rights in its proper sense can exist only where all the states co-operate to respect and protect the rights of each, as defined in the constitutional compact. One of the essential purposes of that compact is to provide for a limitation upon the freedom of some states in so far as such a limitation is essential to protect the rights of other states.

tect the rights of other states. "This is the central position of the whole States' Rights doctrine. The union is only a means of protecting the states by restricting the free-dom of each where the exercise of

such freedom would threaten the safety and welfare of other states. "This is precisely the problem presented by the question of the Eighteenth Amendment. The freedom to engage in the liquor traffic, which before the adoption of that amend-ment existed on the part of all the states, placed some of the states at the mercy of others, enabled some of them to interpose an insuperable obstacle which prevented other states from safeguarding the health, morals and prosperity of their people in their own way. The latter states, which included practically all the states of the South, required protection.

Forms Express Compact "The Eighteenth Amendment was an express compact whereby the States, with practically unanimity.

agreed to give one another protec-"The situation is thus analogous in many respects to that which existed during the great debate over States' rights in the middle of the last century. The South then fe't that there were certain provisions in the constitutional compact which were designed to give it the protec-tion that it needed and which were eral Government invading a sphere of action which the Constitution reserves exclusively for action by the plaint against the Federal Government was precisely that the powers being exerted it give to it the pro-tection to which it was entitled by

FRENCH AWAIT AMERICAN MOVE ON PEACE PACT

ristide Briand Has Not Allowed Plan to Drop-Correspondence Passes

By SISLEY HUDDLESTON
By Special Cable

PARIS, June 9-Unofficial conversations regarding the proposition of a pact for a permanent peace be-tween France and the United States have already been recorded by The Christian Science Monitor correspondent, but now confirmation comes from other sources that Aris-tide Briand, the Foreign Minister, has not allowed the project, supported in many important quarters, to lapse without an attempt to give it material shape. It is possible that before long the proposition will leave the realm of academic discussions where hitherto it has been confined publicly, and be placed on the firmer ground of diplomatic pour-

parlers.
Communications have passed on this subject through the medium of the United States Ambassador, Myron T. Herrick, and it is learned that French action only awaits certain American assurances. Whether such assurances will be forthcoming is perhaps still problematic. They are regarded in advance somewhat doubtfully.

Newspapers Are Silent

Newspapers are singularly silent and unwilling to commit themselves until it is certain that there will not be an American rebuff. The Quai d'Orsay apparently inspires nothing until it knows whether a favorable preliminary response will be re-ceived. It would indeed seem foolish to start a campaign which might result in disappointment. It is hoped, however, that recent events which have improved Franco-American relations will be helpful and among such events Colonel Lindhergh's reception should not be omitted. The flight linked together

the two peoples in closer sympathy Le Petit Parisien says that Washington must soon give a definite answer to the semiofficial overtures but it wonders whether even the pact in the form proposed will not be con-sidered an encroaching on American liberty of action and associating its diplomacy with that of France.

Regarded With Distrust "It is impossible to disguise the fact," says the paper, "that many representatives and senstors regard with distrust, even hostilky a treaty about which they were not consulted. Instead of a special pact, many would prefer the simple renewal of the arbitration convention already concluded with France, England and Japan which will soon expire. One can, without excessive temerity foresee that the American Government will not repel an official conversation, but it will formulate an initial reservation, namely that before be-ginning diplomatic negotiations, an agreement should be reached on the exact nature of the pact, its signifi-cance be defied, and its limits

clearly marked." This advice is regarded as per-fectly sound, and it is felt that a careful draft should be made, showing plainly that the sworn friend-ship between the United States and another country does not imply the slightest obligation of entangling America in the relations between the co-signatory and a third party.

plan for negotiation of a treaty for the elimination of war, the United States Government feels that the fact that there is an adequate existing treaty has been overlooked. Indeed there are two treaties, one of 1908.

with its extension, and one of 1914, looking toward the same end. The President proclaimed in 1914 The President proclaimed in 1914 that a treaty between the United States and the French Republic looking to the advancement of the cause of general peace had been concluded and signed at Washington in September. 1914, the first article of which was as follows:

"Any disputes arising between the Government of the United States of America and the Government of the French Republic, of whatever nature they may be, shall, when ordinary diplomatic proceedings have failed and the High Contracting Parties do not have recourse to arbitration, be submitted for investigation and report to a Permanent International Commission constituted in the manner prescribed in the following

article:
"The High Contracting Parties agree not to resort, with respect to each other, to any act of force during the investigation to be made by the commission and before its report is handed in."

It was further stated in the treaty that the international commission should be composed of five members, two from each government, only one of whom should be of its own na-tionality; the fifth member to be designated by common consent and ties already represented on the com-mission. He was to serve as presi-

While FOOT CRAFT SHOES are made of the finest materials, they are not expensive.

PROHIBITION AS PROSPERITY AID

Employer-Labor Co-operation Also Deemed Important Trade Factor

Special from Monitor Burgau WASHINGTON, June 9-The Department of Labor has issued a summary of the findings of the official British mission, under Sir William Mackenzie, that was sent to Canada and the United States to investigate the subject of America's prosperity
The amplified account of the British report declares that prohibition, in-stallment selling and other factors are considered to have increased the market for American-manufactured goods, while the attitude of employ-ers to Labor has had much to do with the continuance of prosperity

The Mackenzie mission made no recommendations with its report.
"Unlike the reports of some of the earlier delegations referred to." the earlier delegations referred to, the American Labor Department states in its summary, "the present report does not attribute the prosperity of the United States almost wholly to designated by common consent and the efficiency of either management ties already represented on the comditions have had much influence Th. wide extent and varied climate while the members were appointed by a year only their appointment has be reenwed. This treaty is still fective.

Prohibition a Factor

The after-war policy of American employers to cut wages in the defla-tion period was resisted by American tion circles and even Mr. Borah has labor, the report continues, with the been cool to them.

labor, the report continues, with the result that the employers' policy changed "to the reduction of costs" other than by further wage reduc-tions. There was also a concentration on increasing productivity and a general increase of efficiency which, with the maintenance of the purchasing power of the people at the highest level, has had a far-reaching effect on American indus-

try generally."

Prohibition is mentioned as having affected prosperity by diverting large sums into the purchase of commodities and by increasing the regularity of attendance at work Large scale production credited with reducing costs; restriction of immigration causing employers to substitute machinery for man power: amalgamation of industry, standardization of production

tending to make mass production of heap products easy:
American Better Mechanic

The system of installment buying must be approached with the great-est caution, says the Labor Depart-ment report, echoing the British statement, but it is true that it "must have been a great factor in increasing the internal trade of the country and consequently the prosperity of

industry."
The British report shows dubiety as to whether the American worker is more efficient than the British worker; he has, however, it states, become more accustomed to using machinery.

Action of Maine G. A. R. in Voting Return of Flags Promoting Good Will

AUGUSTA, Me., June 9 (Special)—
Further cementing of the good will by shippers, it is announced today by Erank Van Ummersen, chairman of the G. A. R. of Maine in voting to take steps to return the old Confederate battle flags to the South, said Nathaniel W. White state density.

15, at the South Station, attended by

take steps to return the old Confederate battle fiags to the South, said Nathaniel W. White, state department commander, in the closing session of the two days of the sixtieth annual encampment in the State House.

There are nine captured fiags now left here, and Gov. Ralph O. Brewster was today presented with a petition from the G. A. R. asking that he take steps to return the regimental colors. The petition, adopted by the 30 members present out of the membership of 538 in Maine, pays a tribute to the bravery of the Confederates and speaks of the united nation resulting from the Civil War.

The petition says:

The petition says: Nine Confederate Flags

"That, Whereas there are among the archives of the State nine Confederate flags, captured by Maine regiments during the late Civil War; and a consideration of the views exampled at the hearing and written

to a glorious termination in 1865, the Union saved, and we have been a Union saved, and we have been a united country ever since, now the mightiest nation on earth, with no bitterness toward our foes of those with charity for all; and we have been a that, it is that they cannot see their way clear to a concurrence in the desired reduction in rates on this traffic."

days, but with charity for all; and "Whereas, The Confederates were brave soldiers, struggling mistakenly for what they then conceived to be right, and it was no disgrace to them that they were defeated by the Union saved, and that we were a free peo ple and the question of slavery and right of secession had been settled forever, as having no place in this

union of states;
"Therefore, the Department of
Maine, Grand Army of the Republic,
in annual convention assembled at glorious State, respectfully suggest that these Confederate flags be returned to the survivors of those or ganizations from whom they were captured; realizing that the infirmities of age rest heavily upon us, but with vision undimmed and with hearts warmed by love and good will, proudly look upon our country united and free, in which there is no north, no south, east or west, but one and indivisible, whole and with hearts too big to harbor ill-will or malice toward those who were once our foes, now co-patriots who have proven their loyalty and devotion to our flag, to the new na-tion born under God's guidance that President Lincoln saw at Gettys-

pressed at the hearing and written testimony, the association announces that, "it is the consensus of New England carriers that they cannot

"Secondly, the carriers are now confronted with the general investi-gation by the Interstate Commerce Commission (I. C. C. Docket No. 17.ets under Docket 17,000, all dealing with heavy weighted commodities. It is understood this inquiry of the commission is for the purpose of determining whether commodities generally speaking are bearing their reasonable proportion of the transportation burden, with the view of determining whether on farm products transportation costs can be reduced, and it would be inconsistent at this time to reduce rates, particularly on traffic moving in less than carload lots and in this instance on a commodity which cannot be a commodity which cannot be viewed other than as high grade. "Thirdly, because the New England

carriers are even now attempting to revise upward their rates on iron and steel articles and granite and a reduction in the rates applying upon textiles would not be consistent with these attempts."

Among textile interests attending the hearing and favoring the re-ductions were: William F. Garcelon, secretary of the Arkwright Club of Boston; J. J. Cummings of the New Hampshire Manufacturers Associa tion; Andrew Raeburn, New Bed-ford Cotton Manufacturers Associa-tion; C. E. Smith of the Cotton Manufacturers Association, Fall River; G. W. Haverhill Union Officers Again to Seek Removal of Neutral Arbiter

HAVERHILL, Mass., June 9 (AP) —A conference suggested by Judge Crosby to settle the controversy be-tween the workers' union and the tween the workers' union and the manufacturers in the shoe industry here over the tenure of office of Edwin Newdick, neutral arbitrator of the Haverhill Shoe Board, failed of its purpose here last night.

Representatives of the Shoe Workers Protective Union declared that Mr. Newdick had disqualified himself by recent public statements.

himself by recent public statements that indicated that he was not neutral while the trustees of the Haver-hill Shoe Manufacturers Association held that the removal of Mr. Newdick at the present time would harm the industry.
The union officials announced

that they would appeal again to the court for an injunction restraining Mr. Newdick from holding office. The union recently sought an injunction against the neutral arbi. When the veto came before the trator, but the court suggested that counsel for the two organizations in joint conference settle the controversy.

union declared the office of neutral arbitrator vacant last month and notified the shoe board that the share of Mr. Newdick's salary paid by the union would be suspended indefinitely.

WOMEN'S RIGHT TO HOLD OFFICE TO BE DECIDED

New Hampshire's Supreme Court Expected to Hand Down a Finding Soon

CONCORD, N. H., June 9 (Special)
New Hampshire Supreme Court
will hand down a decision soon on the right of women to hold office. The test case is based on the peti-tion of Jennie Blanche Newhall to Governor Spaulding for appointment as a justice of the peace.

Miss Newhall, in her argument,

uoted Chief Justice Robert J. Peas lee of Manchester as saying in an address before the Bar Association

a ruling despot, but rather a friendly adviser, whose counsel may or ma not be controlling, as it is found to prove its truth, justice and appliability. The common law then is a development. It advances here and recedes there, as the changing human conditions it meets are recep-tive to its wisdom of the past, or

Miss Newhall expressed the opinion Miss Newhall expressed the opinion that the status of women has changed of developed, in much the same way. Years ago the New Hampshire Supreme Court ruled that women might be appointed attorneys-at-law. "Our common and our fundamental or constitutional law have been effectively changed," she went on, "by the Nineteenth Federal." went on, "by the Nineteenth Federal Amendment, by chapter 3 of the ex-tra session of 1919 and indirectly by legislation consistent with the adoption of the amendment. It seems to me that the real questions for this court to consider are:

"1. Has the Nineteenth Amendment changed the common law so that, without specific legislation, a woman appointed a justice of the

"2. If not, has there been legislation or action which justifies such appointment?

"3. If the governor and council may appoint a woman justice of the peace under existing laws, may they also appoint women to other office as to which there is not specifi-legislation to the contrary."

ELECTION HELD BY UNITARIANS

Conference Presidency-Dr. Shieh Speaks

An all-day session of the Plym outh Bay Conference of Unitarian churches was held yesterday at the Hingham "Ship Church." Judge C. Carrol King, presiding at the meeting, was re-elected president of the conference. Election of other officers was also made, and, after devotional exercises, addresses were delivered by the Rev. Dr. E. Stanton Hodgin and the Rev. Thomas H.

During the afternoon meeting Dr. Tehyi Tsieh, director of the Chinese Trade Bureau of Boston, spoke on conditions in China, and asked the aid of the United States and Great Britain in bringing the issues to peaceful settlement.

He explained the rennaissance movement that has been slowly gath-ering force, saying that it was most difficult to appreciate how young criticizing the traditional values of

because it was not a real revolution in the sense that the French or Russian revolutions were real. It never touched the thoughts, beliefs, ideals of the people; it was merely a change in government

gious life, the social life, the family customs and the fundamental attitude in scholarship and in thinking."
He spoke also of the literary evolution in China and how it had changed the language, caused the textbooks to be rewritten, and placed.

textbooks to be rewritten, and placed a literature capable of being under-stood within reach of a vast majority of the people. This new Chinese renaissance, he concluded, "is the conscious development of an unconscious movement that has been gathering force for 2000 years."

A class of 19 was graduated to-day. The Rev. Dr. Robert W. Wycks of Holyoke spoke and his messags was readily understood by 200 children and young people who watched his lips. Mrs. Calvin Coolidge formerly taught in the Clarke School.

Passengers to Be Urged to Sing

Cunard Line Equips All Ships With Melody Books to Add to Pleasure of Journeys

Community singing books have een added to the equipment of all passenger steamers of the Cunard Line plying between Europe and the United States, the local office of the steamship company announced to the six Wacco and Kinner air-planes. Extending out across the big flying field from this hangar, cinder runways 1200 feet long are lty singing brings the passengers to be laid down as take-offs for other form of entertainment in which they now participate.

The books are said to contain

English, Scotch and Irish folk songs, as well as many American college and patriotic airs. Community singing is said to have reached a wide state of popularity in England at the present time.

CAMP FIRE GROUPS TO MARK GIRLS' DAY

Inspection of New Home Is Included in Program

"Girls' Day" is to be observed by the Camp Fire Girls of Greater Bos-ton at their new home, 324 Commonwealth Avenue, Boston, from 10 a. m., to 4 p. m., next Saturday.

Girls from all over the Greater

Boston district, which covers cities and towns within a 30-mile radius, will inspect the new home, play games, sing camp fire songs, partake of refreshments, and have a general good time in their new quarters. Many of the groups have an especial interest in this new Camp Fire Home, since they have been busy all

winter raising money to contribute toward the purchase of the house. The names of these groups of which there are more than 100, with appear on a framed Founders' List, to hang over the fireplace in the room which is to be known as the Ciris' Boom is to be known as the Girls' Room.

The committee in charge is composed of chairman, Mrs. Jean Casson, Lynn; vice-chairman, Miss Ma-della Small, Saugus; Mrs. E. Maude Glazier, Malden; Mrs. E. H. Elder, Newton Highlands; Mrs. Cora V. Foley, Wellesley Hills; Miss Evelyn Watson, Reslindale; Miss Jean Martin, Newton Highlands and Miss Ada Champlin of Melrose. The musical

program will be in charge of Mrs. Sally Lawrence of Boston and Miss Helen Gresty of Malden. REVERE CAR SERVICE CHANGE IS OPPOSED

East Boston Residents Object to Increased Traffic

The petition of the Eastern Massachusetts Street Railway Company to the Massachusetts Department of Public Utilities for the right to operate 12 cars per hour instead of six on the tracks of the Boston Elevated Railway Company to Maverick station on Saturdays, Sun-days and holidays from Memorial Day to Labor Day, was opposed yes-terday by the entire East Boston delegation in the Legislature in behalf of the citizens of that district. The commission on Jan. 25 authorized the Eastern Massachusetts thorized the Eastern Massachusetts company to operate six cars per hour on those days over the Elevated's tracks, this giving the Eastern Massachusetts a complete service from the Revere Beach loop o Mayerick Square.

Andrew A. Casassa, president o the amusement division of the Revere Chamber of Commerce, spoke in behalf of the petition. He said he understood that the North of Boston Transportation con-ference, composed of public officials and citizens of Chelses Revere and East Boston, favored the petition.

AT MANCHESTER FOR CONFERENCE

SESQUICENTENNIAL New Hampshire Rail Issues Expected to Be Outlined by B. & M. President

> MANCHESTER, N. H., June 9 Special)-New England Shippers' Conference began sessions at Manchester today with representative attendance from six states.

Gov. Huntley N. Spaulding, George Hannauer, president of the Boston & Maine Railroad; Robert Dollar, presdent of the Dollar Steamship Lines; Frank Feather, president of the Chamber of Commerce, and the mayors of 11 New Hampshire cities, are honorary guests of the city. W. Parker Straw, agent of the

Practically every community in the

in the schools, who had for the last three years been engaged in the work of preparation for the town's sesquicentennial. Hundreds from this and surrounding towns attended to the statement to make regarding the Boston & Maine policy in New Hampshire.

Governor Spaulding, too, will distance the statement to make regarding the Boston & Maine policy in New Hampshire. tended.
Two direct descendants of Captain and Madame Frye, William Clay his position regarding the State's attitude toward the larger carriers, The Governor has been in conference with Boston & Maine execu-

tives and he is expected to disclose the State's next move in connection with the railroad investigation authorized by the last Legislature. Captain Dollar will speak on the transportation situation in the Far East as compared with American methods of railroading. He will also furnish the members with first-hand information concerning the current conditions in China.

VERMONT GOVERNOR JOINS EASTERN STAR

Grand Chapter of State Opens Its Annual Meeting

MONTPELIER, Vt., June 9-The the county extension department at initiation into the Order of the Eastthe Essex County Agricultural School yesterday. They came for the whole day, with basket lunches, and the children were cared for by girl students in the school's homemaking Middlebury chapter, was one of the department while the mothers at-tended the morning and afternoon the grand chapter of Vermont here

A style show in the forenoon illustrated the dress of yesterday and today and demonstrated the increase of the practical features of woman's attire.

During the afternoon session Mrs.

During the afternoon session Mrs.

Elizabeth Macdonald, professor of vergous and a welcome in behalf.

The welcome to the grand chapter

spiritual life."

Mrs. Annette T. Herr, state home demonstration leader, in analyzing the homemaker's job. urged women to evaluate their tasks, to eliminate those which are not fundamental, in order to release time for the big things in the home and to place above all others those tasks that contribute most to the hampiness and the property of the hampiness and the state of the s

spoke of the training of children as one of the great objectives of homemaking and she said that more important than proper feeding and clothing of the child is the creation of a right mental attitude in the child and the proper training to enable him to meet the problems of life.

Speaking, too, of modern dress, Miss Nourse said that more important than well-finished seams is the choice of clothing, its appropriateness from the point of personality vers. past department commander.

SPECIAL TRAINS BRINGING MANY TO RADIO SHOW

Exhibition Space Demand so Great Existing Space Is Again Divided

CHICAGO, Ill., June 9-More than 4000 members of the radio trade will be present at the opening session of Radio Manufacturers Association, with every indication that the attendance will be swelled to 5000 be fore the end of the week. The Fed-rated Radio Trade Association and the Radio Writers League will also hold conventions simultaneously.

Special trains from every section of the country will begin arriving in Chicago on Saturday, each regular train carrying special sections or cars from noon Saturday until Tuesday morning. A large number of jobbers and music dealers will arrive prior to Saturday, the Music Industries Chamber of Commerce con-vention at the Stevens the week of June 6, and the Cunningham conventhe Palmer House on June 11 being the attractions.

Special trains from the west coast, picking up delegates at Ogden, Utah and Denver, will arrive on Monday as will the special trains East. More than 200 radio men will arrive on a special section

first presentation together with the Cities Service Male Quartet through

the National Broadcasting Company's Red Network on Friday evening, June 10, direct from Cham-

New York City, beginning at 8 o'clock, eastern daylight time (7

o'clock, central daylight saving time). The Cities Service Orchestra of more than 30 pieces begins at

this time a series of concerts to be throughout the summer months.

An inspired theme will serve as the vehicle for the introduction of

the Cities Service Orchestra to the

radio audience, for it will open its program with "Devotion" of Victor Herbert. "Devotion" is a separate

orchestral selection not taken from any of Victor Herbert's operatic

works, wherein the skilled composer

shows some of his accustomed use of giving instrumentation with an

is causing trouble and mix in a new one without the change being de-tected by the radio audience.

In appearance, the condenser microphone resembles a somewhat elongated box camera. Finished in black crystallized lacquer, the microphone box is mounted on a gunmetal pedestal, which may be adjusted to any desired height. A 1½-inch aperture in the face of the box

admits sound to the disphragm.

The condenser microphone is equipped with the necessary circuit to carry the voltage applied to it. One stage of amplification is used with a specially developed vacuum tube and output transformer. The attery voltage for the "mike" unit and the amplifier tube is fed to the instrument by a thin, flexible cable. This may be of any length, satisfactory tests having been made with a 900-foot run.

ZETKA TUBES MADE
WITH CLEAR GLASS

A number of Zetka radio tubes have been recently tested by this office and found to give an excellent performance over a good period of time. These tubes differ from the ordinary vacuum tube in that a special filament is used.

BOY SCOUTS REWARD SERVICE OF LAWYER

CLEVELAND, O., June 9 (Special) -Unusual Boy Scout honors have been conferred on James Metzenbaum, attorney, who has been made

The award was granted "in consideration of distinguished legal service," and was presented by John K. Doan, Scout executive of the Greater Cleveland Council, before a gathering of 2000 Scouts in City Hall Council chamber. Mr. Metzenbaum defended the Greater Cleveland Council in a lawsuit last year, refusing to accept any fee for his services. The case also attracted the attention of the National Boy Scout

KANSAS CITY, Kan. (Special Correspondence)—Cultivating good fellowship by means of the airplane will be promoted a second time by the Chamber of Commerce of Kansas City in its annual tour of a group of Kansas cities. The cham-'s trip last year, using airplanes, believed to be the first of its kind in the United States.

Plans for the tour this year, June 16 to 18, include the use of 11 machines, each of which will carry an average of two passengers in addition to the pilot. Prizes are to addition to the pilot. Prizes are to birthday their mother gave to each be given for the airplane showing of them a beautiful white coat—but

INTERNATIONAL FLAG DAY VANCOUVER, B. C. (Special Corcouver join with American centers in an international flag day at the Peace arch—at Blain on the boundary between this Province and the State of Washington has been indorsed by a committee of business men headed by the Mayor, L. D. Taylor, July 2, was recommended as the flag day and the event will be marked by a program of interna-tional games and a basket picnic.

The Diary of Snubs, Our Dog

Then up the tree he scooted and pretty soon he came down with the little kitten in his arms and as he did so the lady came out of the house again and I wish you could have heard what she said! Any way, what I telt like afterwards was a lot more than two cents!

Junset Stories

The Butterfly Children and the Rainbow

a deputy commissioner-at-large by there lived a happy family of butter-the Greater Cleveland Council of flies. There were father, mother, and three children. Now butterfly chil-

dren in Africa are different from butterfly children in Europe, or in America, because lots of them have long tails. These three had a very kind mother and father, and on their the coats were not long enough to over their tails. So each butterfly child had two lovely black tails showing below his white coat.

KAHN CONSTRUCTION CO HOLLY WOOD CALIFORNIA

ONG ago, in a wonderful African children to go out to play as she was forest, full of tall cedar trees, clear brooks, and lovely flowers, cleaning. So they all three put on their new white coats, arranged their tails nicely, and off they started into the forest. As they flew joy-

fully along they talked about what they should do, and where they should go. All at once they all should go. All at once they all thought of the same thing together. Was that not curious? Well, when you hear what it was, you won't think that it was curious, because, as they were kind children, they were always thinking loving thoughts about other people, and they had thought how fine it would be to brighten up their friend Mrs. Lunin, who was not able to go about Lupin, who was not able to go about visiting. She lived in a lonely spot in the forest, and as she was a lower, she could not fly like butter-

Now to get to Mrs. Lupin's home the butterfly children had to fly up and up and up over the tall trees.

Special from Monitor Bureau

WASHINGTON, June 9 — The
United States is to witness the unusual spectacle of President Coolidge calling an extra session of the
incoming Seventieth Congress next
October, not primarily to deal with
flood control, but to enable Congressmen to get a quick start on
their legislative duties and to get their legislative duties and to get out of Washington by June 1, 1925, in preparation for the coming election campaign that involves the whole House and concluded the considers it entirely too early to decide. fion campaign that involves the whole House and one-third of the members of the Senate.

DETROIT, Mich., June 9 (Special)
—Permission to make borings for testing soil conditions in Windsor, Ont., preliminary to construction of a vehicular traffic tunnel between a vehicular traffic tunnel between the second of the Senate.

Pressure has been brought to bear on Mr. Coolidge by influential members of the Senate.

Pressure has been brought to bear on Mr. Coolidge by influential members of the Senate.

Pressure has been brought to bear on Mr. Coolidge by influential members of the Senate.

SAN ANTONIO, Tex. (Special Correspondence) — Echoing the statement of his bishop, the Rt. Rev.

William T. Capers of the Episcopal

pared to finance this international tunnel project, planned to connect the by the failure last session of the sector of the large St. Mark's Church the business sections of both cities. He said the tunnel would be completed within two years of the time. eventual action on Mississippi flood control. Mr. Smoot, like Wesley Jones (R.), Senator from Washington, who also saw the President, does not believe flood control plans can be evolved in time to make an early session necessary on their account.
Mr. Jones however, also favors an

early session as do also the leaders of the House. Although the matter received slight comment from Mr Smoot, the coming fight over Sen-ators-elect Smith of Illinois and Vare of Pennsylvania, upon which depends the organization of the Senate, is prominent in the thoughts of Republican leaders. An extended contest over the seating of these men

A Talk About Shadows

By ELEANOR COLBY

dO MANY people, Art is like a | nicknamed "roundheads" by some

state parlor which is kept locked on week days and tinguished guests followed by the remainder of the Sovereign's Escort. Lining the whole of the route are men of the Grenadier, Coldstream, men of the Grenadier

locate the shadows.

Rembrandt was a great master of shadows. The next time you are in a fine library, go on a Rembrandt hunt and study reproductions of the heads painted by him. Often the faces are almost lost in shadow, for mystery about his pictures. Perhans mystery of their shadows. The Emperor Napoleon used to like to surround . himself with mystery, and when he rode out in the state car-riage or attended the opera, he would sit back in the shadow of the drap- You who would go to London, eries and only let people get an occasional glimpse of him. However, right out into the cheerful sunlight

and let us all get acquainted with Among modern artists, Whistler loved the mystery of shadows as well as did Rembrandt of old. Many of his exquisite landscapes were painted when the fog, mist, or moonlight made the shapes of things shadowy an illustration which shows one of his "nocturnes sketched when there were no bright lights or deep shadows. But there are very few Whistlers, and to most amateur artists, sunshine is a great help. On a gray day when both sunlight and shadows are taking a vacation, things look monotonou the moment the fogs and clouds lift was playing hide and seek come out of its hiding place and smiles a cheery welcome—and most of us like cheer and happiness even better that

Often things that look quite com monplace under the strong light of noonday become very picturesque mantle over them. Get the habit of finding beauty in the shadows. Notice the shadows of vines, trees, grasses and weeds cast on wall or pavem Remember, too, that these shadows are teachers. One poet said. This I learned from the shadow of

My influence may fall where I may never be.

Now when you leave the studio shade. You never thought that shadows were particularly beautiful or helpful, but if everything were bathed all over and all of the time in a glare of sunlight, we should be as unhappy as poor King Midas who wanted everything turned to gold wanted everything turned to gold

Current Events

The Summer White House

HE final announcement from Washington of President Coolidge's vacation plans finds South Dakota extending a hearty welcome to him and his party to the Black Hills. The President is to stay at the State Lodge, some 30 miles from Rapid City. The executive offices are to be in the high school at Rapid City, while staff members will live near by in private the may be renewed through generation.

One, however, here in Bristol, Eng., forest reserve. More than 50 years ago the district was first partly explored by an expedition under General Custer, when gold was discovered. Today the Black Hills are one of the richest gold-mining sections in the country, as well as one of the door to go, when a cat, evidently waiting for this, ran in. I then sat down on a chair and he politely will be added to the capacity for its own honors, and the responsibility for its own service."

Something to Play

You have played "Birds-Beasts-more white House is regarded as a fine tribute to the West, and to west-

fine tribute to the West, and to western people, and it is expected that he will have an opportunity to study my lap, put his forepaws in an embracing way up on my shoulder and may prove one of the issues of the coming campaign for the Presidency.

the Bellanca monoplane Columbia, of transoceanic flying, hopped off from New York for an unnamed point, with Clarence D. Chamberlin, pilot, and Charles A. Levine, companion and managing distance fixed portation, aboard. It arrived at Eisleben, Saxony, 110 miles southwest of Berlin, at 5 a. m. two days place as its home and would never enter any other building—except his, the verger's house in order to be fed. It had always been quiet and good, it had always been quiet and good, at the verger's house in order to be fed. It had always been quiet and good, at the verger's house in order to be fed. It had always been quiet and good, at the verger's house in order to be fed. It had always been quiet and good at a columbia designed for transoceanic flying, hopped off from New York for an unnamed point, with Clarence D. Chamberlin, pilot, and Charles A. Levine, companion and managing distinct for the Columbia Aircraft Corporation, aboard. It arrived at Eisleben, Saxony, 110 miles southwest of Berlin, at 5 a. m. two days daylight saving time, at midnight).

This flight has set a new long-distance flying record. The former daylight saving time, at midnight).

This flight has set a new long-distance flying record. The former for a musicians, plumbing for a trade, inventions, explorers, poems—and the one pointed out must name a "kind" of whatever has been called, and do it before the leader can swiftly count 10. If that person loses in the contest, he in turn takes the floor and is "it."

For instance, you might answer demor mulberry for a tree, Ford for a musicians, plumbing to New York to set the contest, he in turn takes the floor and is "it."

For a provided, it contents the contest, he in turn takes the floor and with the contest, he in turn takes the floor and with the contest, he in turn takes the floor and with the contest, he in turn takes the floor and with the contest, he in turn takes the floor and with the contest, he in turn takes the floor and the one pointed out muntane "kind" of whatever has been called, Paris. Chamberlin and Levine flew about 3790 miles. They had stored enough gasoline for a flight of 48 hours, but bad weather exhausted their supply of fuel and they were forced to make a landing. Their destination was unknown at the start, but thought to be Berlin, or, for that matter, any of the larger cities of Europe, and at present the German city, where the fliers eventually landed, is giving them an enthusiastic welcome.

The Profession of Business

Business as a profession has recently taken an important place in ings of the graduate school of business administration. The ceremony was simple and impressive. Several thousand were present-college presidents, representatives of the city. State, and Nation, leaders in indus-try, professors and students—and watched with sympathetic interest while George F. Baker of New York handed to Dr. A. Lawrence Lowell a gold key, symbolic of his (Mr. Baker's) gift of the \$5,000,000 necessary for the erection and partial endowment of this educational plant.

remind you lovely June is here.

Let us think of other round or semi-rounding objects and see again how the shadows help to bring out the form. Nature makes many of her seedpods round, and though we cannot find burs by the wayside in June, we can remember how they look for we are training our memories along with our other faculties. I will draw a common little wayside bur without shadows (4) and again showing the shadows (5) and you can easily see that shadows are great beautifiers.

The human head is not round, though our histories and diction-aries tell us that the Puritans were

them gold railings.

This is the first comprehensive approached with ceremony on state occasions, but with no Procession and the details are as pleasure in the experience. Here shadows, and the little house which make them. It was seen for the first time by the public this spring in the Queen's Dolls' House Room, which was formerly the china room and cleverly adapted by Sir Edwin Lutyans. R receive from everything around us. If you know nothing of beauty, you may be surrounded by it and never know it . . . like the caterpillar in when Night throws her

Lilacs, and a Child

friend, the fortunate possessor of a given me! An armful of reminissmall garden, appeared at my door cence and recollection.

an hour since with an armful of illacs Of course, it is most unlikely that for me, the gardenless, Emerson was he understands this to the full, for saying: "Flowers and fruits are al-ways fit presents; flowers, because they are a proud assertion that a ray of beauty outvalues all the utili-ties of the world. These gay natures contrast with the somewhat stern countenance of ordinary nature; they are like music heard out of a workhouse." Just at that point it was that I heard my friend's knock on the panel, as perfectly timed as

on the panel, as perfectly timed as any stage entrance in a play.

If there is any gift more gracious than flowers, no poet or lover—supposing for the moment that there is a difference—has yet imagined it. They seem to say that since, for purposes of use and need, all of thine is thine as well, and all of thine is mine, we may, or rather we must, ignore utility altogether in our gifts of friendship. Yet a poem may be a fitting return for a gift of flowers, and seven an essay, if it gropes in the direction of poetry, need not be despised. For who has ever made any use of an essay, and who has ever so much as felt the need of one? Felt the need, of friend, who has a garden, continue, then, to bring me lilacs year after "that the child plucks its first flower year, and I, who have nothing but the top of my writing-desk to raise significance which the subsequent beauty upon, will send him essays in botanist never retains.

This friend's generosity errs, if at all, only on the side of magnificence, for an armful of lilacs is perhaps "something too much." In our dealings with flowers at any rate, we can be also be a superhaps to the side of the superhaps at any rate, we dealings with flowers at any rate, we may escape the quantitative standard. I have chosen four or five of the more nearly perfect panicles, together with a few of the lustrous

T WAS a happy coincidence that I week, tingeing my thoughts and cate essay on Gifts just when my it turn out to be, then, that he has

cause we have never spoken of such matters. How little we know of the things that lie closest to the hearts of our most intimate friends! Perhoping uncertainly, and without a

who has ever so much as felt the need of one? Felt the need, of course I mean, before the essay to meet the need has been provided, for often enough we are made aware while reading an essay that it answers an unconscious want, just as I am now aware that I have long been wishing for lilacs. Let my friend, who has a garden, continue, then to hring me liles year after "thet the child placks" says froreau.

Sitting here at my work during gether with a few of the lustrous heart-shaped leaves, and placed them in a copper basin of water upon my desk. There they will remain for a dust of three decades have risen again to touch the edges of my thought with a serene glory.

Ah, how we strive, but strive in vain, to seize firmly for ourselves and to convey in words to others the quality, the ineffable charm of these visitations from the past! But words, however subtly and even masterfully handled, are not fit for such fairy work. We cannot shape the thistledown fabrics of fancy with the tools that were made for thought. And we often feel that if words cannot be made to do this they are worth little except for utilitarian purposes Often it seems that the whole work of the poet is no more than a failing effort to recall and to express the intuitions of his childhood.

+ + + During this hour a child has been among the thoughts of an over-la- Southwark one mid-April evening bored man. Those thoughts are noth- near the close of the fourteenth cening to him—or rather they are worse than nothing, an impediment. He has no thoughts whatever, no learn-their actions and words on the jouring, no tasks to do, and if he has a sort of wisdom, it is merely instinc-tive and unsupported by reasons; yet he persists, gently, never forc-ing himself upon my attention, but still striving to break through, hop-actual group of pilgrims of which

art of shaping words to the expres-sion of thoughts and feelings. (How strange that he should be ignorant that he and I are somehow one!) Without speech of any audible kind he makes me understand, brings me

nothing. They were to him, I take it, an earnest of the earth's opulence, of its unforeseen and scarcely credible largess. They appeared on the summit of golden days that had long been climbing from splendor on to splendor—from bluebirds to violets, from apple-blossoms to orioles, from t low whistle of the quail in the corn to the delicate dewy steeples of illies-of-the-valley. And just when it seemed that the world was brimming full and could hold no more of beauty there came these perfect flowers to crown the triumph. They city of today, overhung with fog and smoke, but one fairly justying the filled him with a wordless gratitude have known how to ask. Oh, it was things, for he never thought at all. I do not even assert that he ever consciously looked at the lilac bush in blossom. Yet somehow the happiness and the wonder of those days passed into or was focused by the lilac bloom, for now all the magic

Shepherd With His Sheep. From a Drawing by Barry Pittar.

Chaucer's Public

For more than five hundred years men have read with delight of that group of twenty-nine pligrims whom Geoffrey Chaucer represents as comhovering here at my desk about and ing together at the Tabard Inn in ney to Canterbury have been set down for us with a vivid naturalism actual group of pilgrims of which ing still to make himself heard.

And at last I do hear him. He has he himself was a member and merely no words to say, for this child of reported the incidents and tales of whom I speak scarcely knew any an actual pilgrimage. On the other words whatever and had certainly made no progress in the intricate perhaps too soberly—about the matter, have rejected this view as alto gether without justification and have taught us that the pilgrimage of words and that the man whom I purely imaginary and that the group call "I" should know little else; yet of pilgrims was artifically conthat he and I are somehow one!) structed by Chaucer to include and exhibit representatives of all the principal classes of society and oc-

memories innumerable, overwhelmingly powerful and dear. And then I remember; the lilacs have brought richly illustrate English il and manners admits of no doubt, here are, however, several consider one to questio the ury of words, I find something to say about this child's love of lilacs which will be clumsy and inadequate, no doubt, but better than

paratively small social group, to the members of which the persons, places, and experiences hinted at were thoroughly familiar. Allusions which to us mean little or nothing were instantly intelligible to the hearers and readers for whom he smoke, but one fairly justifying the epithets of "small and white and clean" applied to it by William Morris—a city of many gardens, with a population of about forty thousand. . . . The business of the country

If my friend remembers such things as I do, there is no wonder that he brings me liliacs every Maytime—and brings them and how much else, by the armful.

O. S.

This morning, just before daybreak. I surprised a Japanese print Hanging in my west window. Pale blue-gray hills—
A round orange moon, ready to set, And a long bar of white mist
Trailing the river:

Respect Cushman.

Respect Cushman.

The surprised of the contemporary population of the sudience. Chaucer was not writing for posterity or even for the whole contemporary population of England, but for a handful of courtiers, gentlemen, churchmen, professional men, officials, and city merchants. There was no need to give them a systematic view of four-teenth century life.—John Matthews Mann. In "Some New Light on Chaucer."

In und wat a lass as passes. Again he tarries into guess, and subtacted whits and whits and surprise and business of the surprise and how conceived and received like a local it by giving an upward tilt to every note as if to give it a merrier lilit. But always he makes the listener understand what a happy thing it is to give it a merrier lilit. But always he makes the listener understand what a happy thing it is to give it a merrier lilit. But always he makes the listener understand what a happy thing it is to hunt about cool, mossy stones, and to peer under exemple and the spirit and pure on every note, caressing it tenderly, on every note, caressing it tenderly, one conceived like a local throw on every note, caressing it tenderly, one conceived like a local throw on every note, caressing it tenderly, one conceived the spirit and hit is a local to give it a merrier lilit. The development of the wold and received like a local to g If my friend remembers such and guess at the success of many things as I do, there is no wonder of Chaucer's sly "digs" and "hits"

Shepherd With His Sheep

Written for The Christian Science Monitor

There is power in morning light flashed from the sky upon the mountains, A peculiar solemnity, a steadfast shining. The sun has the world to himself up there—

close to him—
And piles the shadows one upon another to intensify their blueness.

The grass is too short to sing,

and there are no trees.

It is a solemn time in the early morning on the sides of the mountains. The sheep move slowly, contentedly, tracing the upward track,

Their woolen backs a soft gold in the light,
Their little black feet picking a way daintily
between the loose stones and over the harder surface.

follows his thinking.

How strange that all the world has not chosen to be a shepherd, high up on the hills

in the midst of the morning!

The Canyon Wren's Cheerful Note

In appearance there is nothing to building his nest where a mountain for the world in general nor was it all booting more or less in unison. Peculiar det, and not come near the "published," in the modern sense of But the canyon wren is—every inch cabin. That morning, however, at of him-a musician, and he meas- five o'clock, when the wintry air ures five and a half inches, a full imparted a frosty clarity to his notes an extent that he has earned the sobriquet of the "scale bird." It is the good old tonic scale, at that, had been extended to him; perhaps

was predominantly rural—agricultural and sheep-raising—and the population predominantly rustic. The nobility and gentry numbered not greater commendation, for he sucnore than a few hundred, and their song so much spontaneity, and so social life centered in London. . . Such a public, idle, fond of gossip, ally a work of art. The same bird and the control of the con Such a public, idle, fond of gossip, ally a work of art. The same blue of the spring is centered in these flowers. They bring back the odor of morning rain, of damp earth under the apple trees; and the song of the wood thrush.

You have the song of the wood thrush.

They friend remembers such and suess at the success of many on every note, caressing it tenderly, and guess at the success of many on every note, caressing it tenderly.

attract one's attention particularly stream foams coolingly near, the to this little wren, unless it be the canyon wren is not discouraged by cream-colored crayat that he and all any chilliness in the air. Woman and Queen

This afternoon I have had my farewell audience from the Queen at Buckingham Palace at four o'clock. which will walk about alone soon, lately; my pearls, and a crême velvet bonnet with light blue feathers. I went in the ordinary open carriage (not gala). The gala carriage with the powdered wigs, big footmen, canes, etc., went out yesterday for the last time in the drawing-room. I had some difficulty in getting into etc., as the Queen was leaving this afternoon for Windsor. I was sent from one entrance to another, in spite of the tricolour cockade, and finally drew up at a side-door (where that ye may be perfect and entire, a shabby little victoria was stand-wanting nothing," he did not couning). A man in ordinary black liv-ery appeared, and after a short par-ous conditions; neither did he urge saying that I was the French Am-bagsadress and had an audience did he present the thought so pic-turesquely portrayed in another a room on the ground floor. I waited about fifteen minutes (it was five said, "Behold, the husbandman with the Queen) he showed me into minutes to four when I arrived), and then Lady Southampton, Lady in earth, and hath long patience for it, I would come so soon (and I was a little afraid of being late, they kept little afraid of being late, they kept reality of good and its laws. It must

yard, and in about ten minutes the Southampton said she couldn't come, as the Queen wished to see me alone, so I followed the servant down a long corridor—he stopped at a door, knocked, a voice said "Come in," room, no traces of habitation, nothing pretty or interesting. The Queen was standing, very simply dressed in black (her travelling dress, she said, she was starting at once for Windsor) before a writing-table which was in the middle of the room, covered with books and papers. She was most kind, made me sit down on the sofa next to her, and said she was afraid she had kept me waiting, but that she had been kept She expressed great regret at our departure, and hoped we were sorry to leave England and all our friends, out after all Paris was not very far

back-would he continue his literary

leagues-our successor, etc. . . She kissed me at parting and gave without regard to station. the same smile, was always inclined good wife and n to talk about anything and to under-stand and smooth over any little dif-an unsympathetic pupil, who was ficulty or misunderstanding. I think she is a wonderful woman and a wonderful Queen. In her long life said, "It is not her fault that she has wonderful Queen. In her long life she must have had many difficulties, and questions and responsibilities, and certainly England has not suffered under her rule. I met Lady S. in the no one belonging to her, and will have to earn her living." She never corridor, who came downstairs with may and said she was quite sure the tone, or as if she wanted to teach us Queen meant it when she said she would like to see me again, that she never said anything she didn't mean.

Wallowing mid-leg deep in snow, they attacked towering trees with confident air, whistling, singing and shouting. Their action was titanic, and the could play the scale hearts of the cabin. Shouting the could play the scale hearts of the cabin. Shouting the could play the scale hearts of the cabin. Wallowing mid-leg deep in snow, there are influenced by circum-distance of the cabin. Wallowing mid-leg deep in snow, there are influenced by circum-distance of the cabin. Wallowing mid-leg deep in snow, there are influenced by circum-distance of the c shouting. Their action was titanic, their cheer superb. A day's labour reached from dawn to dusk, and no man thought of shirking his dufy, or if he did he was shamed into action by his fellows who took savage pride in long hours and fatigue.

Sheltered from the savage winds by the high pines, they toiled even while the storm-clouds whirled in furious rout above the trees, and and worked almost uninterruptedly

Patience

Written for The Christian Science Monitor

many people who do not under-stand the meaning of the word "patience." Patience to them means little more than mere endurance, the toleration of unideal conditions and making the best of untoward circumstances. Thus one sometimes hears a person who is apparently the victim of a so-called chronic disease spoken of as "very patient;" whereas, as a matter of fact, if such a one is accepting the unideal conthe court-yard, which was filled with dition as real, and mentally submitcarriages, luggage-vans, soldiers, ting to it, there is little or no real patience in his attitude of thought, for the very kernel of patience is the

expectation of good.

When the Apostle James wrote, "Let patience have her perfect work, ley (in which I intervened myself, a stoical endurance of them. Rather turesquely portrayed in another Waiting, appeared, with many apolo-gies for being late—she didn't think We went upstairs to a small draw-ing-room looking out on the court-of spiritual facts; for only thus can it confidently await "the early and same servant in black appeared say-lag, "The Queen is ready to receive which fructify the seed of faith and the French Ambassadress." Lady bring forth the desired harvest. bring forth the desired harvest.

The individual who knows that God, whose essence and nature is anocked, a voice said "Come in," pronounced it "very good," has a and I found myself in the Royal presence. It was a small, ordinary room, rather like a sort of male. consciousness, operate as spiritual law: and so however inharmonious outward conditions may seem to be, he holds with steadfast faith and patience to his vision of Truth, and confidently awaits the manifestation of good in his human experience

Madame Clara Schumann

Her greatness consisted in this perfect self-control, and I would go off, and she hoped she should see me so far as to say that it made a again. She was sure M. Waddington Christian of my mother in the truest so far as to say that it made a would find plants to do when he got sense, though she did not realize it She repeated that she hoped to see keynote of her relations to all hu- quent unfoldment of spiritual disme again, so I asked if ever I came back to England might I write to one of her ladies, and ask if I could back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to England might I write to one of her ladies, and ask if I could be at her bringing it into harmony with allow patience to "have her perfect to the back to the one of her ladies, and ask if I could be received. "Pray do, and I shall not say good bye, but au revoir." We keen observation and unerring judgtalked about fifteen minutes about ment. Her kindness embraced all all sorts of things—some of our col- with whom she came in contact,

me her photograph, signed, in a handsome frame—then half turned the people whom she admitted into her back, moving to a door on the other side of the room, so that I said on one occasion, "Mama, how could get out easily and not alto-gether à reculons which would have been awkward. To open the door I tucked my parcel under-my arm, opened the door myself (a thing I don't often do in these days except my bedroom door) and found myself rity." And she said, "You may be again in the long corridor. My audi-ence was over, and I dare say I shall for which I respect them. The husnever see the Queen again. She was band is clever and a good worker unfailing to us both from the first moment, always welcomed us with

an unsympathetic pupil, who was a lesson. They came quite spon-taneously, as though it were the most natural thing to say. while the storm-clouds whirled in furious rout above the trees, and snow fell thickly, softly through the tossing branches above their heads. There was charm in the sense of safety which the forest gave. The calm at the roots of the trees was like the quiet of deep seas.

Sunday, the day of rest, was given over to shaving, washing, mending clothes, and other brave attempts at restoring the decencies of civilized life, while the cook, in the effort to make the mid-day meal a Sabbath feast, baked a "plum-duff" or a huge dried-apple pie.—From "The Trailmakers of the Middle Border," by Hamses Busca.

TT IS safe to say that there are | Such patience is very far from being mere passive submission to the unideal. Indeed, it is a very alert and active denial of it, because it is a joyful anticipation of the triumph of right.

Humanly speaking, perhaps no one has to exercise more patience than the husbandman or farmer. Day after day, and week after when there is no sign that his efforts he labors and waits. But this waiting is full of hope and expectation seedlings appear above the ground; indeed, he would be much surprised. if they did not appear. All through the arduous months of tending, weeding, and pruning, he still has "long patience," as he looks forward confidently to the time when "the precious fruit of the earth" shall

It is just this patience, this joyful expectation of good, that an under-standing of Christian Science makes possible. In his wonderful little book, "The Greatest Thing in the World," Professor Drummond defines patience, in part, as "love waiting to begin." Christian Science goes a step farther, and says that Love does not have to wait to begin, for the law of Love is ever operative; and the realization of this fact enables one to await patiently the unfolding of Love's good plan in his present human experience. The little green shoots may not as yet have thrust their heads above ground, as it were, but he knows that, watered by the former and the latter rain of increasing spiritual perception, and warmed by the sunshine of unselfed love, they will duly appear and mature, until the desired harvest is garnered.

On page 340 of "Miscellaneous Writings" Mary Baker Eddy writes, "The lives of great men and women are miracles of patience and perseverance." Surely this is because every truly great character the world has ever known has caught some glimpse of the Christ, Truth, and therefore, with that faith which is an understanding of the reality and ever-presence of God, good, and the unreality of all that is unlike God's nature, can await hopefully and joyfully the unerring operation of divine law. Thus, every great achievement has been made possible because of the individual's percepherself. Infinite benevolence was the tion of spiritual fact, and the consework." Mrs. Eddy declares (ibid. p. 268), "Through patience we must possess the sense of Truth; and Truth is used to waiting."

HARVARD ROWS FOUR MILES AGAINST TIME Caught at 23m. 27s.—Brown

Selects First Eight Saturday

RED TOP, Conn., June 9 (P)—Ex-cellent rowing conditions on the river gave the Harvard University crews, in training here, an opportunity to get in some good work yesterday afternoon and the two varsity boats and the combination crew were out for long maddles.

combination crew were out for long paddles.

The two varsity crews paddled down to the railroad bridge and then came back over the four-mile course upstream in short stretches. The first varsity was timed at 23m. 27s. for the distance. The boat had the wind at its back, but was going against the tide. The combination crew had a three-mile paddle. The freshman crew will arrive at the camp today.

It had been expected that the men for the first varsity boat would be definitely selected today, but Coach E. J. Brown 36 announced last night that he would await a time trial on Saturday before he picks his oarsmen to represent Harvard in the big race against Yale.

The three crews were out on the Thames yesterday morning also, under very good conditions. The varsity and

Thames yesterday morning also, under very good conditions. The varsity and junior varsity paddled three miles on the course at a stroke seldom over 21. There were short attetches in which attention was given to blade work and

YALE VARSITY HAS FIRST TIME TRIAL

Rows Four Miles in Unofficial

Time of 23 Minutes GALES FERRY, Conn., June 9 (AP)

—The Yale varsity crew in training here had a time trial yesterday afternoon, rowing lover the four-mile course down stream. No official time was given cut: but spectators caught the time at 23 minutes. The crew covered the first minute at a 33-stroke, the second minute at a 34-stroke and then settled down to a 32-stroke. The last quarter mile was rowed at a 35-stroke.

A freshman crew time trial was broken up by a submarine that backed out of the submarine base in the path of the boat. The crew started out at a 38-stroke, dropped to a 34 and then to a 32. The coach George C. Murphy, was well pleased with the showing.

Lancasterians

Leading Standing Have 8.13 Advantage Over the Runner-Up in Intercounty Cricket

By Wireless from Monitor Bureon via Post Telegraph from Halifas LONDON, June 9-Lancashire's victory over Yorkshire at Manchester, yesterday, by 8 wickets in a charac teristically keen "battle of the roses has consolidated the champions' posi-tion at the top of the standing in the

tion at the top of the standing in the English intercounty cricket competition. The Lancasterians with 86.25 per on have now a lead of 8.13 from the innerup. Leicestershire, and 12.64 over the many times champion, York-12. Then come Nottinghamshire wide 71.42; Middlesex with 70.83; Surveyith 65.62.

I do weather, which marked the first month of the season and resulted in plethora of runs, broke down over the Whitsun holiday week-end, and as a consequence the time factor bulked largely in several fixtures concluded yesterday, notably in that between Hampshire and Kent at Southampton. Only a minute or two remained for play when the Hampshire star, C. P. Mead, made a winning hit. Incidentally, he scored his ninety-sixth "century" in first-class cricket. The only batsmen with more three-figure in-

mead, made a winning int. Incidentally, he scored his ninety-sixth "century" in first-class cricket. The only batsmen with more three-fixure innings to their credit are J. B. Hobbs (141), W. G. Grace (126) and Thomas Hayward (104).

Another close finish was seen at Lords Ground here where Middlesex having compelled Sussex to "follow on" was confronted with a task of making 131 in 95 minutes. The batsmen managed to keep ahead of the clock and won by six wickets with 10 minutes. to spare.

Essex entertaining Worcestershire at Leyton, gained its second victory of the season by a comfortable margin of 179 runs. Gloucestershire had seven men still to bat and 110 runs to get and so was quite well placed when the game with Somersetshire had to be left drawn owing to rain.

Other unfinished matches were Leicestershire vs. Northamptonshire hower, took three wickets with consecutive balls-only instance of the "hat trick" this season—and Derbyshire vs. Warwickshire, which gave "Tiger" Smith, well-known Warwickshire wicketkeeper, an opportunity of sooring 117 runs, the highest score of his career.

Outside the county championship race, Oxford University had slightly the better of a drawn game with the New Zealand tourists, who previously had gone down heavily before Cambridge University. This result strengthens the Cantabs position as a firm favorite for hundredth chash between the rival blues at Lords here in July.

CINCINNATI SIGNS SHORTSTOP NEW YORK, June 9 (P)—John White, star abortstop of the Fordham Univer-sity baseball nine for the last three years, signed a contract yesterday to play with the Cincinnati National League Baseball Club and has left to join the team in Cincinnati

Architecture—Theaters—Musical Events

Two London Architectural Exhibitions

much about architects, something about clients and a little about the general public.

It is clear, for instance, that the public does not yet care enough about architecture—at any rate it does not show its interest by visiting exhibitions in any great numbers. No doubt lack of publicity has something to do with this, and the sensation of mild disquiet that besets many people at the sound of the words, "institute" and "architecture." Apparently they are somehow associated with technical mysteries which the layman feels are beyond him. It is a pity, because there is a great deal in both shows to interest and amuse anyone. He would find churches in all styles (there are four Christian Science churches illustrated in the two exhibitions), he would find banks, Masonic buildings, a throne for one king and a palace for another, schools for his boys and cinemas for himself.

And then the houses! Where would you like to live? In Oxford, Yorkshire, Piccadilly, the Cotswolds, Ireland, Delhi or Bagdad? There are houses in half the world to choose from, and of sizes and tharacter to suit most purses and taste. Do you like models? Then the institute is the place for you; thatched cottages, country houses, a hunting box, an inn—you will find them all there, and, even more umusing, Mr. Clough Williams-Ellis' "Holiday Village" at Portmeirion. Now that you know what an architectural exhibition really is like surely you will never miss going to one.

Of the clients, whose wishes are in acceptance of the clients, whose wishes are in acceptance.

like surely you will never miss going to one.

Of the clients, whose wishes are the seed from which all this harvest is derived, the most interesting, when one remembers its horrid past, is the Government. There is hardly a corner in the country which has not been disfigured at one time or other by some squalid structure set up by a government department for its own uses. It is, therefore, a majter for real congratulation that the office of works are now erecting post offices and other hulldings as seemly and as suitable as those illustrated on the walls of the institute. The greatest of these and the most interesting is the radio station at Rugby, a workmanlike building by, a workmanlike building inality and dignity. Other na-

tions may have shown the way, but it is good to think that England, too, is now doing it so well.

If "evil communications corrupt good manners," good communications good the white by Mr. Muirhead Bone. This drawing and Mr. Tait's drawing of the good of those who all architectural to take of those who all architectural and particular good the same properties

drawing (within reason) the more satisfactory the result. From the point of view of mass and numbers the banks are the out-standing features in this year's tanding features in this year's ea ibitions. Lloyd's, the Midland an a Westminster all show designs or their head offices—each one quite fferent but all alike in size and agnificence. In addition to these ere is a fine combetition

Designed by Messra. Adams, Holden & Pearson.

On Record

Beethoven Recorded: Choral Ninth in Full Significance; Chamber Music

HAVE lengthy Beethoven festivals stated both the music and the man for you? Would you have his greatness reaffirmed and heightened? Then by all means turn

licity nor ostentation. The statement in the June catalogue reads, "The Symphony Orchestra conducted by Albert Coates, with the Philharmonic Choir, has made, in England, a new recording." From this brief announcement, one might not reasonably anticipate such an astounding achievement as Albert Coates and his players and singers have made. For this set of eight double-disk records is quite the best registration encountered in months.

The conductor and the musicians under him have bettered their previously reconded performances, and from a mechanical point of view the new release is exquisite. The first movement swings into a firmly rhythmical reading. A martial zest yibrates through it. Even the delicate passages trip along with a suaveness quite lacking in sentiment. Only in the recapitulation does a bit of dreaminess and fantasy tinge the foreboding close. The orchestra under Mr. Coates displays a finely rounded ability, though not, it is true, the finish which American audiences have come to demand of their established organizations. For example, a faw instances of lack of precision occur; yet these produce no more than a quaver on the musical consciousness. Elsewhere, the listener is aware of a constantly increasing power and vitality of utterance.

Helds Immense Force under him have bettered their previously recorded performances, and
from a mechanical point of view the
new release is exquisite. The first
movement swings into a firmly
frythmical reading. A martial zest
vibrates through it. Even the delicate
passages trip along with a suaveness quite tacking in sentiment. Only
in the recapitulation does a bit of
dreaminess and fantasy tinge the
toreboding close. The orchestra under Mr. Coates displays a finely
rounded ability, though not, it is true,
the finish which American audiences
have come to demand of their established organizations. For example, a
faw instances of lack of precision
occur; yet these produce no more
than a quaver on the musical consciousness. Elsewhere, the listener
is aware of a constantly increasing
power and vitality of utterance.

Heids Immense Force

The whirling Scherzo seems dominant with rhythmic activity. A flery
impetuousness flashes through the
reading, and as the movement progresses it gathers its forces with an
onrushing momentum. The climax
holds immense force. Mr. Coates
has nade a rather daring interpretation of many of the sections. The

nograph recordings.

Into the songful third movement the players have poured a smooth flow of melodic lines. The tonal balance and the instrumental composi-tion are velvety and smooth enhanc-ing the gentle, pastoral atmosphere

Itself.

For many, the Ninth is simply the Choral Symphony, and the fourth movement, which finally brings the massed voices and the individual soloists into play, assumes great significance. The early entrances of the theme of joy emerge clearly marked but not overemphasized as Albert Coates has seen fit to interpret them. The contrasts are capably handled, and the booming double basses stand out suitably from the main texture. The opening solo summons forcefulness and from the main texture. The opening solo summons forcefulness and impressiveness. The full chorus grows a little heavy and indistinct as it goes on, but not a single solo or quartet passage is blurred. The fugue is clearly indicated, and is especially well-wrought by the soprano section of the chorus, which owns a clear brilliance of tone.

Chorus Noteworthy

onrushing momentum. The climax holds immense force. Mr. Coates has made a rather daring interpretation of many of the sections. The effectiveness of his departures from more usual methods is intensified by some mechanical excellences. In the reproduction of the entire body of orchestral tone, and in the more individual prominence given the atrings and woods, some high points have been reached. To hear the strings and woods, some high points have been reached. To hear the strings and woods, some high points have been reached. To hear the strings and woods, some high points have been reached. To hear the strings and woods, some high points have been reached. To hear the strings and woods, some high points have been reached. To hear the strings and the manner of playing is to arrive at a new comprehension of the powers inherent in phonograph recordings.

Into the songful third movement the players have poured a smooth quickly advancing into the first ranks of string players.

C. S. morous in effect, finished, almost to a fault, and carried through with the large authority that is essential to

Max Jacobs will conduct the Chamber Symphony Orchestra in the Mendelssohn musical setting for "A Midsummer Night's Dream" in connection with the performance of that play in the Forest Hills tennis stadium, Long Island, N. Y., on Sunday night, June 19, for the benefit of the Actors' Fund.

The end of the New York run of "Abie's Irish Rose," may come on Aug. 6, though it may be extended if the announcement of the closing should give an impetus to the business. On that date it will pass the

ness. On that date it will pass the world record of 2238 consecutive performances played by "Chu Chin

the part so well that one entirely forgot he was acting, and felt, quite the part so well that one entirely forgot he was acting, and felt, quite the unjustly, that he was just that sort of man. Stafford Hilliard gives a clever little thumb-nall sketch of a similing dragoman (his brown button boota are a touch of genius!). To him also is largely due the credit for designing the scenery, and achieving in such a remarkable degree the atmosphere of the Near East. While not such a good play as the same author's "Pelican," or "Grain of Mustard Seed," "The Transit of Neurole of Mustard Seed," "The Transit of the Mustard Seed," "The Mustard Seed," "The Transit of the Mustard Seed, "The work Tork for Europe as a representative of the Mustard Seed, "The Work Tork for Europe as a representative of the Dramatists' Guild to consult with British and French authors. He will return early in Atagust for the opening of his new play at the Hudson Theater, New York. Through late acquisitions in the Buckingham, collection at the Chicago Art Institute the print department now possesses all the important items in Van Dyck's Iconog Song" and Stephenson's "May Day." Mr. Thunder conducted "Hall, Bright New York of the men's sung and conducted "Hall, Bright New York of the chorus man and the Mustard Seed, were outnumbered by those of the women, but not sufficiently so to interfere seriously with the balance. The attack was remarkably accurate, the shading and the dynamics even more so. The boat of the Mustard Seed, "The Verus" is yet a very capable piece of the Seed, "The Work of the Philadelphia Orchestra played the accompaniments to the chorus name the ballets which formed the last group of the festival program. The festival began with a Sousa march and "The Merry Wires of Windsor" in the See Standards

From what he hears, sees and reads—or is read to him—your child early forms his ideas of right and wrong and his ideals of conduct. Make his reading a constructive influence throughout his whole life. Begin with My BOOKHOUSE, a mother's selection from the world's great stories and poems for children. Every selection has passed the Three Tests of Right Reading—(1) has it literary merit? (2) Will it interest the child? (3) Does it present sound standards?

The Forbes-Robertson Clan

London, May 20 T THE St. James's Theater, the A Forbes - Robertson Clan in "Twelfth Night." Producer, Robert Atkins. The cast:

trived practical jokes.

His stage companion, Sir Andrew, was by Mr. Norman Forbes who, long familiar with the part—which he played under Sir Herbert Tree, to the memorable Toby of Lionel Brough—gave a finished study that blended admirably with Sir Toby's more robust character and method.

Mr. Courtice "Pounds, as Feste showed clearly that his beautiful voice has lost none of its melodious qualities; out his work as an actor would have been more pleasing were ahowed clearly that his beautiful voice has lost none of its melodious qualities; out his work as an actor would have been more pleasing were it more natural, and less florid. The same thing, to some extent, I felt concerned Miss Gertrude Elliott's daria, which, though fresh and merry, was a trifle too skittish. Miss Maxine Forbes-Robertson, as Olivia.

with JANET GAYNOR and CHARLES FARRELL ed by FRANK BORZAGE HARRIS Thea., 42 St. | Twice Daily H. HARRIS W. of B'way 2:80-8:80 ALL MATS. SOC AND 31.50 the distinguished playing of most great Shakespearean roles. Richard III. Malvolio, Bottom, are three characters in which Mr. Holloway seems to be without a rival upon the English stage today.

The other outstanding, and vividly contrasting, feature of the afternoon was the Viola of that most interesting young actress. Miss Jean

sepecially well-wrought by the soprano section of the chorus, which owns a clear brilliance of tone.

Cherus Noteworthy
The singers who have assembled under the name of the Philharmonic Society have intensified the dramatic suspense and flavor which the conductor sought. The unanimity of their attack deserves notice. Their ability to ascend to rising expressiveness and the impersonal, purely instrumental tone of the massed voices make their manner essentially suited to Beethoven's music. Beyond a doubt, their contribution to this important reading of the Ninth is noteworthy.

Coincident with the Beethoven release has come a recording of Schubert's B flat Trio. Alfred Cortot, pianist; Jacques Thibaud, violinist, and Pablo Casals, cellist, have united for the trio. Each of these men is a master of melodic line. Together they weave into the measures some aplendid passages in the lyrical portions. The interchange of the three instruments is smoothly and capably

is to be, and the theater in which he himself was once a pupil of that fine Shakespearean actor, Samuel Phelps

The production of "Julius Cæsan that is being offered this week at the New Amsterdam Theater by The Players Club of New York is, all things considered, about as fine a rendition of this great play as this

eration "is like to look upon."

Here is a performance that from tart to finish responds to the word ajestic. From the rise of the first urtain until the fall of the last lose who have collaborated in the fering of this production have then this work seriously and the soult is a rounded-out presentation distinction. John Craig as stage frector, Norman-Bel Geddes, de-gner of the "unit" sets, and Eric pe, in charge of the costume de-gning, have each done a noble see of work, and combined with very intelligent acting of the y, offer an evening of rare en-ment in the theater.

The present reviewer has seen wery important American production of this play since the ones given y Edwin Booth and Lawrence Bartt, and although he does not reset, and although he does not re-member much about the first per-formance that he saw, he is sure hat the present production is one of the best ever given in the United states and that its only rival was a William Faversham production e William Faversham production years ago at the Lyric Theater, New York. In that performance Tyrone Power became the ideal Brutus and he remained so to the present writer through his entire
performance last evening at the New
Amsterdam Theater.
Shakespearean commentators ustally consider Horatio in Hamlet
the finest type of man written by
Shakespeare. The present reviewer
likes Brutus. Always wrong in his
military strategy, Brutus was just

military strategy, Brutus was just as right in his human relationships. For one in the last few moments of his life to say:

his life to say:

Countrymen,
My heart doth joy that yet in all my life,
I found no man but he was true to me,
and to have his chief enemy in battle
tay of him, a few moments after he
had finished his earthly career:

New York, June 7
THE New Amsterdam Theater, week of June 6, 1927, The Players, in their sixth annual crevival, Shakespeare's "Julius," Progress means machinery, of its Cassia. William Courtleigh ins Cassar. Frederic Worlock, and Antonius Bentus. But the straining in English Shakespeare mompanies now holds him in case and the straining in English Shakespeare will annual to the program and the straining in English Shakespeare william courtleigh ins Cassar. Frederic Worlock and the straining in English Shakespeare william courtleigh ins Cassar. Frederic Worlock and the straining in English Shakespeare william courtleigh ins Cassar. Frederic Worlock and the straining in English Shakespeare william courtleigh ins Cassar. Frederic Worlock and the straining in English Shakespeare william courtleigh ins Cassar. Frederic Worlock and David Glassford Brutus. David Glassford Brutus. Pedro DeCordoba ins Climber. Roland Bottomley. Roland Bottomley in Climber. Roland R

and James T. Powers. Mary Young plays Portia's single scene with clear understanding, and Marion Coakley is human if a little modern as Calpurnia. Mary Eaton is quite charming and sings sweetly as the boy Lucius.

FRANK LEA SHORT.

"The Transit of Venus"

Special from Monitor Bureau

LONDON, May 20—At the Ambassador's Theater, "The Transit of Venus," by H. M. Harwood, The Special from Monitor Bureau

Cast:
Sir Evelyn Markham. Allan Aynesworth
Patricia Markham. Barbara Dillon
Capt. Ronald Fairfax. Archibaid Batty
Sophis Telford. Athene Seyler
Georga Telford. Nigel Playfair
Arhaba Khan. Raymond Massey
Mi Wesson. Frank Harvey
Mi Wesson. Stafford Hilliard
Mark Dacre. Nicholas Hannen

"One fool does more mischief than a dozen knaves," said Dr. Johnson, and "The Transit of Venus" is an object lesson of this truism. In this case the fool is a silly woman who is haver contented unless she has some equally silly man dangling around her, longing to be rid of her without the courage to run away. However after many etruggles, Ronnie, the hero of this play, does screw up his courage to the running point and gets a job as aide to the Governor of Kherlyan, a mandated territory in Africa.

Sophie Telford succeeds in run—

ritory in Africa.

Sophie Telford succeeds in running him to earth, and arrives at Kherivan on a visit, accompanied by her tame cat of a husband, to the no small annoyance of the Governor, who has to find some entertainment for her. He arranges a trip in the desert whither she and her silly husband shall be escorted by the A. D. C. But her husband backs out at the last moment and, much to his disgust, Ronnie has to go off alone with Sophie. Once in the desert she begins her wiles. Driven to desperation in his efforts to get rid of her, tion in his efforts to get rid of her, Ronnie bribes a neighboring sheik with brigandish tendencies to kidnap her. He does so, and the result nearly leads to international complications. But all is eventually smoothed over and Sophie learns the salutory but mortifying truth that Ronnie had bribed the shelk with her own money to take her away from

any of him, a few moments after he had finished his earthly career:

This was the noblest Roman of them all puts Brutus in a character class by himself. In comparison Cassius' by one of the most accomplished of

Philadelphia's Music Festival

English comediennes, Athene Seyler. Although the play is on the whole a trivial comedy it has its serious mo-ments and solid background. There is a splendid scene where a Euro-

ago, and had been trained ever since the close of the exhibition last fall. It is hoped to keep the organization permanently together in the form of a municipal chorus. The chorus has been trained in four units, under the direction of Henry Gordon Thunder, conductor of the Philadelphia Choral Society; N. Lindsay Norden, leader of the Brabins Chorus; Henry Hotz, director of the Madrigal Singers, a professional organization, and Joseph Smith. Several mass rehearsals of the works sung Saturday eve-Great War." The part of the chief is played with admirable decision and dignity by Raymond Massey. Another serious interest is the genuine love affair between the Govgenuine love affair between the Gov-ernor's daughter and his chief secre-tary, quite movingly played by Nicho-las Hannen and Barbara Dillon. As the Governor, Allan Aynesworth gives another of those finished little comedy studies we have learned to expect and invariably get from him. As Ronnie, Archfald Batty played the part so well that one entirely

DEMAND FOR HIGH PRICED

Sharp Advances in Specialties and Industrial

Issues

Numerous New Highs

Namerous New Highs

New peaks also were attained by
Hinois Central, Denver & Rio Grande
Western preferred. Gains ranging from
1 to 1% points were made by American Smelting, Western Pacific common and preferred and Texas & Pacific
Land Trust.

Equipments were in demand, New
York Airbrake and Union Tank Car
both improving their best prices.

Foreign exchange opened firm, with
an overnight jump of 8½ points in
Spanish pesetas to 17,25 cents, while
demand sterling ruled around
4,35 5-15, and French franca just below 3,91½ cents.

Tremendous activity in, many lowpriced shares was attended by advances of 1 to 2 points, with numerous new high prices for the year being touched.

A block of 20,000 shares of Tmans-

us new high prices for the year beg touched.

A block of 20,000 shares of Transntinental Oil was bought at 6 after
climbed to 7. Atlantic Refining and
ouston Oil, however, were weak,
ederal Mining & Smelting soared 19
sints to 154, a record price.

American Linseed common went up
and the preferred 7, both also new
ghs. United States Rubber shares
uched new minmums for the year
i further liquidation.

The renewal rate for all loans was
inchanged at 4% per cent.

New Bond Offering

Announcement that a syndicate saded by Blair & Co. will offer tomorrow the \$65,090,000 Canadian Naional Railway 4½ a overshadowed all ther developments in the bond marst today. The price has not yet been nade known. Meanwhile listed issues ontinued irregular, and trading was a reduced volume.

City of Milan & were accumulated a rather large amounts around 92, lightly under their high price. Polish a were in demand at fractionally betar prices, coincident with revived reorits that the new loan to the Euroean republic is nearing completion.

Domestic issues were decidedly incitive. Chesapeake Corporation 5s allied slightly, and there was renewed
secumulation of International Telehone convertible 5½s.

United States Government issues
were quiet and slightly lower.

Prompt overscription of the \$15,000,00 City of Copenhagen 5s was reourted soon after the books were
pened.

INTERNATIONAL SHOE EARNINGS

Profits for Five Months Equal \$5.73 Share—Outlook Promising

Business of the International Shoe Company continues to set new-high record, net sales of \$46,551,674 for the five months ended April 30 exceeding this period for any previous year and running \$1,647,668, or 3.6 per cent ahead of the five months ended April 30, 1926.

In this period the International factories produced 1,651,942 more pairs of shoes than in the corresponding period last year, in the latter part of March and first part of April the daily output was more than 168,000 pairs, and this pace was pretty well sustained.

The strong and advancing hide and

output was more than 168,000 pairs, and this pace was pretty well sustained.

The strong and advancing hide and leather markets have done much to stimulate sales of shoes by International and other manufacturers, and this big company has booked substantial orders for later delivery.

In the five months ended April 30, International earned net of \$6,633,548, after provision for income taxes, comparing with \$4,251,947, in the corresponding period of last year. This was equal to \$5.73 a share on 940,000 shares of common stock, after preferred dividends, compared with \$4,35 a share of common in the five months ended April 30, 1926.

In the ful 1926 fiscal year, ended Nov. 30. International earned \$13.71 a share of common stock, so that \$9.36 a share was earned in the final period of seven months, the fiscal being so divided.

The outlook for the balance of the current year is considered by officials as promising so that indications are that 1927 will prove another successful period for the company, possibly exceeding 1926. The company was in very strong financial position on April 30 with current assets there was more than \$2,377.000 cash on hand and \$7,000,000 loaned out on call.

Current liabilities of only \$5,714,-623, a ratio of more than 10 to 1. Of current assets there was more than \$2,377.000 cash on hand and \$7,000,000 loaned out on call.

Current liabilities of income and other taxes. There were no bank borrowings.

Ingot production of the U. S. Steel. Corporation the last week has dropped about 7 per cent; one of the sharpest declines in any week for years, the current rate of between 80 and 31 per cent of capacity being the lowest since late last December. Further curtailment is expected. The average for the entire industry is between 75 and 76 per cent. compared with 80 per cent a week ago. Operations of independent companies are about 2 per cent lower.

Callable as a whole or in amounts of \$506,000 or for Sinking Fund on any interest date on 80 days' notice, at 105 and interest on or before Novem-ber 1, 1928, the premium thereafter decreasing 1/2 during each two years to 100% and interest on and after May 1, 1948.

ny agrees to pay interest without deduction for Federal Income Taxes, now or hereafter detuctible at the not in excess of 2%; and also to refund present Pennsylvania and Connecticut Four-Mill Taxes upon application within 60 days after payment.

First Mortgage & Collateral Trust Sinking Fund Gold Bonds, Series A, 51/2% (this issue), Common Capital Stock (par \$10), Surplus,

From his letter Mr. R. M. Bastman, President, further summarizes as follows:

BUSINESS: Company is the largest printing establishment in the world engaged in the volume production of mail-order catalogs and magazines. It has acquired plant and business of Edward Langer Printing Co., Inc., New York, adding large Eastern plant to its existing capacity and further strengthening its leadership. Annual production about 358,000,000 catalogs and magazines. Customers include Montgomery Ward & Co., Sears, Roebuck & Co., Albert Pick & Co., Gimbel Brothers, and other national distributors. A constant of the control of the contr tract has just been completed for printing of Pictorial Review, with circulation of over 2,000,000 monthly. Other magazines printed include Liberty, Red Book, System, Photoplay, and Judge; total circulation printed more than 14,000,000 monthly. From incorporation in 1893, with original capital of only \$20,000, Company has grown to present position through 34 years of successful operation.

PLANTS: Chicago plant, completed in 1925, contains over 500,000 square feet of floor space situated on 20 acres of land adjacent to Chicago & Northwestern Railway Belt Line at Diversey Avenue, Chicago. New York plant at Jamaica, Long Island, contains 330,000 square feet of floor space, adjacent to Long Island.

SECURITY: These Bonds will be secured by a first mortgage on all fixed assets of the Company owned or hereafter acquired (except assets acquired subject to existing or purchase money mortgages) and by pledge of 99.8% of capital stock of Edward Langer/Printing Co. (which will continue to operate the New York plant) and entire capital stock of a subsidiary formed to own, unencumbered, all machinery in the Chicago plant. The mortgaged land, buildings and machinery alone have a book value of \$7,003,961 and the machinery in the Chicago plant has a book value of \$3,487,233, making a total book value for the property of \$10,491,194, Actual value of this property based on independent appraisals is \$12,858,040.

ASSETS: Total consolidated net tangible assets as of January 31, 1927, including proceeds of this financing and based upon conservative book values, are \$13.697,366, representing 2.28 times total Bonds to be outstanding. Company has no indebtedness to banks, and current assets exceed 3½ times current liabilities

EARNINGS: Throughout 34 years of existence Company has shown a profit in every year. Consolidated net earnings, after depreciation but before Federal Taxes, for year ended January 31, 1927, were \$1. 313,449, or nearly 4 times \$330,000 annual interest requirement on Bonds to be outstanding. Such average net earnings for past 5 years, \$1,032,214, exceeded 3.1 times this interest requirement.

PURPOSE OF ISSUE: Proceeds of these Bonds and of 100,000 shares of new stock offered to stockholders will be used for retirement of \$4,093,000 outstanding bonds of W. F. Hall Printing Company and Edward Langer Printing Co., bearing 6½% interest, acquisition of capital stock of Edward Langer Printing Co., purchase of additional equipment, and increase in working capital.

SINKING FUND: Commencing 1930, sufficient to retire annually 33/4% of all Series A Bonds issued.

We Recommend these Bonds for Investment

Dallas Journal: Our hope should be that as voting machines come in machine politics will go out.

THE SALAD ARTS

Terre Haute Tribune: Certain people in New York are preparing an art exhibition to consist exclusively of saiads. One hesitates to go on record in such matters, but it looks as if these persons had stumbled on one of the great discoveries of the century. Ages ago some experimenter—probably Nebuchadneszar—toying with grasses and herbs, came to the rash conclusion that they were food; and so unprogressive is human thought that his belief, though often doubted, indeed has never been overthrown.

But now the New York younger set, with characteristic boldness, declare that all such forage, in whatever disguise of mayonnaise or Thousand Island dressing—and all the more certainly because of that dressing—is nothing but a work of art. It thus becomes practicable for a guest, when offered saiad at a dinner table, to express delight in its beauty but, declining to eat, suggest that it be hung in an art gallery. THE SALAD ARTS

That "Inevitable" War

T LEAPS out at us from the news from every quarter of the globe, this assertion of the certainty, the inevitability of war. Correspondents, wherever located, seem to find it a pet phrase. War is "inevitable" in the Balkans because the ambitions of Mussolini and the desires of Jugoslavia clash in Albania. It is 'inevitable" in Asia Minor because the Italian need for more territory will come into conflict with the French mandate in Syria, or Kemal's plans for building up a great Moslem empire in Angora. It is. "inevitable" in central Europe because of the Danzig Corridor. It is "inevitable" again in the Balkans because of the Greek hold on Saloniki. It is "inevitable" in far-off India as in nearer Egypt because of Bolshevist encouragement of native hatred of Great Britain. Wherever there is a racial clash, wherever a seaport or a bit of land is coveted by some nation, wherever a rapidly growing population tends to overflow its territory, the alert correspondents see war inevitable, proclaim it so, and by so doing help to incite it.

But nothing that is abnormal is inevitable. War, like other evils, is abnormal, while peace is the normal and ordinary condition of the world, as good is the normal and common lot of man. It is well enough to uncover evil conditions that may tend to provoke hostilities between nations, but the very fact that they are uncovered usually has contributed to their correction. There is excitement today among the more bellicose correspondents because Jugoslavia has broken off diplomatic relations with Albania. But the immediate effect of that action has been to call the attention of the League of Nations to the strained relations existing between two of its members.

Albania could hardly exist as a separate and independent nation without the League's countenance and support. Jugoslavia, created out of postwar conditions, is in no position to reject the offices of the international organization for the maintenance of order. If back of Albania, as is suspected stands the figure of Mussolini. it is better by far that the fact should be given world-wide recognition, and that the force which checked the hand of Italy when raised against Greece should be given a new opportunity to serve the ends of peace.

Doubtless between nations, as between men, there will often arise differences, frequently honest on both sides. But the fact no more makes wars "inevitable" than it makes personal encounters "inevitable." A force, of which the League of Nations is only one of many manifestations, exists today which is rapidly making war between civilized nations unthinkable.

The Success of Irak

TN THESE days of political turmoil in Asia it is refreshing to turn to a country which seems to be making progress along the difficult paths of education in democracy without disturbances and with remarkable success. The land of Irak, better known in the west under the name of Mesopotamia, has figured little in the newspapers since the rebellion of 1920. Freed by the British during the Great War from the domination of the Turks, it has been the scene of an extraordinarily successful experiment in reconstruction, an experiment which reflects equal credit on the local Arabs, on King Feisul, and on the mandatory power and its officials. The quiet which Irak seems to enjoy, so far as the outside world is concerned, is the quiet not of repression but of the smooth functioning of a system of government which seems to be based not upon abstract theory but upon a peculiarly sane recognition of the actual facts

By the Anglo-Irak Treaty, Irak became an independent state subject to the minimum of supervision by the British High Commissioner on two points: its external relations for which the mandatory power was responsible to the League of Nations, and its finances so long as Irak was under financial obligations to Great Britain. Its local government is therefore entirely in the hands of the Arabs, who have the assistance of a number of British officials, but these are appointed not by the High Commissioner but by the Arab Government. Except in the two matters of international relations and finance, therefore, the trusteeship of the British relies on influence and not upon control, which in these days of equality between nations and races and of self-determination is a wise ar-

rangement. Perhaps the most interesting provision in the Irak Constitution is the arrangement about voting. Students of political science have long pointed out that the theory of democracy could not work out in practice unless the people themselves were both educated and intelligently interested in public affairs. The principal difficulty which stands in the way of the establishment of democracy in the Orient is the lack of universal education and political apathy of the mass of the population due to centuries of acquiescence in autocratic forms of government. In practically every case the abstract theories of democracy worked out in the United States and during the French Revolution have so far failed to function when they have been applied by their enthusiastic supporters in Oriental countries.

The Irak Constitution gets round the difficulty ingeniously. It recognizes that if progress in democracy is to continue, the individual citizen must be made to take an interest in public questions by being made to vote. An indirect system of election, therefore, has been introduced. The country is divided into a large number of small constituencies in which the individual voters vote for secondary electors on the basis of there being one secondary elector for every 200 primary electors. The secondary electors then meet in larger constituencies and elect the eighty-eight members of the Irak Parliament. The system works because the illiterate primary voters make their choice, not on political questions which they do not as yet understand, but on their knowledge of the personal quality of the people in their own locality, while the secondary electors, being men of

some standing and substance, are thus left as the ones to make the choice of members of

These two elements, the indirect system of election and the unobtrusive but none the less effective advice given by the British officials, when combined with the wisdom and experience of King Feisul, the man who both led the Arab revolt against the Turks and was the first ruler of Syria after the war, seem to have solved up to the present time all the problems which have lately caused such trouble in Egypt, India, China, and elsewhere. The Irak system steers a sensible middle course between undue control by an outside European power and an undue yielding to the abstract theories of the extremists, and gives to the country what it really needs, an adequately competent and stable government and a gradual but genuine training in the beginnings of self-government. The Irak model is one which might well be studied in other countries where the problem of reconciling the needs of good government with the theory of democracy has hitherto proved to

Practicality in Flood Control

NE of the most important problems pressing for immediate solution by the people of the United States, involving as it does their future welfare and prosperity, is the control of the Mississippi River. Fortunately the need of prompt action is universally recognized. A convention attended by 1800 delegates-state governors, engineers and influential citizens of varied classes representing many commonwealths-has been considering the matter in Chicago. By unanimous vote it urged President Coolidge to call a national conference for

There is lively discussion for and against the necessity of a special session of Congress to deal with the complicated question. There can be no doubt that the energy, enterprise and wisdom of the inhabitants of the great valley and the country at large will find a solution and begin its application as speedily as the great size and many ramifications of the problem will

But there is one phase of the matter that deserves constant consideration in all the discussions of proposed plans, because of its practicality and its relation in the long future to any general plan of control that may be finally adopted, with special reference to its bearing on the ultimate cost of the huge enterprise That is the reforestation of the headwaters and banks of the thousands of rivulets, brooks and streams of all sizes that ultimately pour their mighty united contributions of water into the great channel that must be controlled.

Many who have discussed the situation have spoken of the forest end of the problem as remote, unpractical and only slightly connected with flood conditions. A knowledge of history and the experience of many nations for centuries reveals that this view is mistaken. France. Germany and other countries of Europe discovered long ago that the forests had close and important connection with the flood problem and acted accordingly. Americans may well profit by their experience.

One glance at a map of the United States on which the streams that flow into the Mississippi are outlined discloses the huge number of the water courses, big and little, that contribute to the great river's flow and the vastness of the territory, stretching from the Allegheny to the Rocky Mountains, that their network covers. Keeping this picture in view and realizing in a measure the enormous volume of water that flows from this area, one may readily see the importance of forests in delaying and regulating the delivery of excess rain to the Mississippi channel.

Right at that point lies the practicality of the reforestation end of the flood problem. Whatever plan of Mississippi control is adopted -higher levees, banks set farther back from the channel, dams and the impounding of large tributaries, parallel canals-any or all of these will cost huge sums of money. When that money is expended, there will still be no guarantee that the works constructed will hold the great river at all times and in all emergencies, unless some plan is devised to slow up the flow of flood waters in the great network of small streams in which that water originates. Forests will do this very satisfactorily. They in time will thus insure the efficiency of whatever costly works are constructed along the main

channel and its big tributaries. Objection to the forest plan is made that it is too slow. Necessarily it will take time, but here its practical value again comes in. While new tree plantations, which will ultimately protect the capital invested in great engineering works. are growing, they at every moment with little care or expense will be producing future wealth for the whole country in improved soil conditions and in vast amounts of forest products that the nation is going to be in need of more and more.

A plan that will perform an important function in flood control and at the same time produce great wealth would seem to be a wise one.

Auditoriums and Memorials

WITH the tercentenary in 1930 of the founding of Boston, Mass., approaching, the fact that a war memorial has yet to be decided upon, while there is a great need for a vast auditorium, appears to afford a splendid opportunity for the working out of something that would stand as a permanent monument at once utilitarian and ornamental. By combining resources something quite distinctive and

imposing seems possible at least. Mayor Nichols has caught the vision, and is endeavoring to harmonize the various groups to hasten the solution of the problem. If an auditorium is to be built in time for the tercentenary, action must be taken right away. If the memorial idea is incorporated in the auditorium, it is pointed out that there is a possibility that the World War veterans may hold their 1930 convention in Boston. They might even dedicate it at that time. An auditorium could serve as a useful part of the tercentenary celebration. The problem is, therefore, to design

something that would serve all the purposes in question and yet be acceptable to everyone con-

One of the hallmarks of old Boston is its ivy covered walls, and naturally there are those who want them retained. With this cherished ideal the Mayor earnestly sympathizes. Yet he points out that there are those who are giving money, time and talent to keep business thriving. Such activity brings a natural development and expansion and modernization. Again he sympathizes, but he believes that out of it all a plan may be evolved that will combine and harmonize the valuable points in each and effect something of which all citizens may well

The Typewriter in Colors

ANY persons will at first thought wonder Why there should be such an innovation as variously colored typewriters; and others, more quickly imaginative, will foresee the business world brightened, and even "speeded up." when these now somber machines take on rainbow hues and the maidens who operate them, presumably, wear costumes to

This illumination of the business world, however, is too much of a jump. The innovation, it appears, is so far confined to the portable typewriter. Considered seriously, it shows how important a place these smaller machines have taken in the home. A demand is apparent, or at least the belief that such a demand can be aroused, for beauty as well as utility. One must consider the color scheme of the room in which one typewrites, and it is at once evident that whereas a green, or perhaps a red-and-black, typewriter would be appropriate in the library, it would strike a false note in the guest chamber, where something say in ivory and gold would be more graciously harmonious.

Entering the home almost surreptitiously to enable the busy head of the family to write with one finger an occasional chatty letter to some business correspondent, the portable typewriter soon wormed its way into the affections of the entire family. Mother found it interesting to indite with one finger an informal social note: Johnny liked the neat manner in which it printed his school compositions; and the baby was delighted with the discovery that it rang a bell. When not in use it remained, theoretically, in its convenient case, but habit grew to leave it even more conveniently exposed on the table, where the casual visitor also took pleasure in playing with it. Thus, wherever it gained admission, the portable typewriter soon made itself at home, yet remained alien in appearance, like an office boy in a drawing room. It might even happen (in a conceivable case) that just when the head of the family wanted it to write one of his chatty business letters, the daughter of the family would be using it to write a short story which she hoped to sell to a popular magazine. And then, of course, the head of the family would have to hold his finger till she had got to

the bottom of a page. It is not surprising, therefore, to find that the portable typewriter has gone in for color, following the example of the fountain pen, and accepted an esthetic responsibility in our present renaissance of domestic beauty. It is unfortunate that the colonists had neither typewriters nor fountain pens, but taste can at least harmonize them in color with a colonial interior. The pen is still necessary to sign the epistle written on the typewriter, and here it is interesting to note how gold has superseded steel, which in turn had superseded the quill. Lest we become too proud of these achievements, however, it should be remembered that writers have written just as well, if not so legibly, with a quill pen as anybody can hope to do on the most imaginably handsome typewriter. Nor should proud possessor of a purple portable forget that there is still a large industry engaged in the manufacture of steel pens and ordinary penholders-or, as one might say, "plain pens for plain people."

Editorial Notes

Worthy of at least passing comment is a statement made by Miss Bertha Mapes, chairman of the speakers' committee of the Prohibition Educational League of Bronx County, that the first prohibition speech in America was made by an Indian more than 126 years ago. According to Miss Mapes, at a yearly meeting held in December, 1801, by the Quakers of Baltimore, an Indian chief appeared with the committee on Indians, and in his speech begged the Quakers to use their influence with Congress to induce that body to enact laws forbidding the sale of liquor. The chief is quoted in part thus:

Our brothers and friends: We plainly perceive, brothers, that you see every evil that destroys your red brother. It is not an evil, brothers, of our making; we have not placed it amongst ourselves, it is an evil placed among us by the white people; we look up to them to

If they have that friendship for us which you tell us they have, they certainly will not let it continue amongst us any longer. We tell them, "Brothers, send us useful things, bring goods that will clothe us, our women and our children, but not this evil liquor, that destroys our reason, that destroys our health, that destroys our lives." This liquor they introduced into our country is more to be feared than the gun and the tomahawk.

Many will be interested in statements made recently, in connection with the Lindbergh flight, to the effect that an airplane requires no more care than the average car and costs less to operate, at the same time being very little harder to learn to manipulate than is an automobile. These statements have been made by Capt. Elliott White Springs, who served in the air service during the World War and who has paid much attention to the airplane situation in America since then. What Captain Springs has said calls attention further to the fact that there are now eleven airplane manufacturers in the United States building good sturdy airplanes to sell between \$1750 and \$3500 all of them having the same general characteristics that they will carry three people at eighty-five miles an hour for five hours and will take off and land on an average golf course in case of emergency. Truly, it would seem that the day of private aviation is not far distant.

The Diary of a Political Pilgrim

FROM A LONDON CORRESPONDENT

Doumergue, the President of the French Republic, and of M. Briand, the French Foreign Minister, to London and Oxford, has been widely taken as a reaffirmation of the entente cordiale between Great Britain and France. Though diplomatic correspondents are, perhaps, apt to exaggerate the meaning of these official meetings and conversations, there is no doubt that relations be-tween France and Great Britain are much more friendly today than they have been at any time since the Peace

Whether the visit can be taken as a "reaffirmation" of the entente cordiale or not depends upon what is meant by that term. The phrase "entente cordiale" has almost as elusive a meaning as another diplomatic formula on the other side of the Atlantic, the "Monroe Doctrine." Both seem obvious enough until you try to express exactly what they mean. Entente cordiale means friendship and friendly co-operation between Great Britain and France, the Monroe Doctrine says to Europe, hands off America. It is the application of these simple ideas which makes the

The entente cordiale came into effective being about 1904. It was the outcome of two things. On the one hand after many years of squabbling and bickering, especially in Africa, both France and Great Britain, after the dangerous crisis of Fashoda in 1896, reached a decision that if serious trouble was to be avoided they must sub-stitute agreement for rivalry. Hence the series of treaties and agreements which settled the difficulties between the two nations in Egypt, in Morocco, and elsewhere.

On the other hand Great Britain and France were

drawn together by the action of the German Government in starting to build a formidable navy. The Dual Alliance between France and Russia had been formed in the early nineties as a balance to the Triple Alliance, so far as the armies on the continent of Europe were concerned. The entente cordiale was the almost inevitable rapprochement between France and Great Britain when to the most powerful single army in Europe Imperial Germany proposed to add an extremely powerful navy.

The events of the next ten years strengthened the feeling between the two nations. There was never any written treaty or agreement between them. But the Herzegovina crisis, the successive additions to the German naval program, the Agadir crisis, the expansion of armaments on all sides, and so on, produced an increasing conviction that a situation was developing in Europe which might require the co-operation of the two even on the

The outbreak of the World War on Aug. 1, 1914, justified this view and for four years the two nations were united not only in arms but by a treaty under which each undertook not to make peace without the other. Though Russia fell out of the struggle in 1917 her loss was more than compensated for by the entry of Italy in 1915 and of the United States in 1917. It was the combination of these four western powers which eventually won a complete victory for the allied cause.

It was these same four powers, or rather France, Great Britain and the United States, Italy being in a condition of internal disunion, who drew up the treaties which remodeled the world in 1919. The idea of the entente cordiale fell into the background. It had stood the test of the greatest world crisis since Napoleon, but it now seemed to be unnecessary. Isolation and alliances were to be no

THE recent cordial and successful visit of M. | more. The nations were to be united in a league of all nations, with the three powers just mentioned as the central guiding element, united in a joint Anglo-American

tral guiding element, united in a joint Angio-American guarantee of security to France.

This vision, however, gradually faded away. Bolshevist Russia was actively hostile to the League. The United States refused to join it. Italy, after being overwhelmed by internal division, deserted democracy for the unknown paths of Fascism. Great Britain and France became more and more estranged over post-war policy in Europe itself. Great Britain was convinced that there could be no permanent peace except by readmitting Germany on an manent peace except by readmitting Germany on an equal basis to the comity of nations. France was convinced that she could only attain to security by trying to keep Germany in subjection.

At the time of the occupation of the Ruhr it looked as if Europe was going to sink into chaos. But gradually things began to mend. The Dawes Commission made a settlement of the difficult reparations issue; the Ruhr was evactiated; finally came Locarno. Locarno was a com-promise between the British and the French points of view. On the one hand Germany was admitted League on equal terms and the first section of the Rhineland was evacuated; on the other Great Britain gave what amounted to a guarantee to France against an unprovoked

invasion by Germany.

Thus Locarno implied a partial restoration of the old entente cordiale. It had no longer an anti-German bias. It was rather an understanding that in the difficult task of keeping the peace of post-war Europe a cordial intibetween Great Britain and France, both in the meetings of the League of Nations and in other diplomatic negotiations, was not only valuable to the two powers principally concerned, but was essential to peace.

Remarkable progress has been made toward stabilizing Europe, although, of course, much has yet to be accom-plished. Russia has not, for instance, given much evidence of reconciling herself with the rest of Europe, and Germany appears discontented with her eastern frontier, even though her leading statesmen are resolute for peace. The Balkans have long had a reputation for unrest, and re-cently there have been disputes over Albania. There is no necessity, however, to emphasize these facts at the expense of the steps that have already been taken toward a

In such conditions it is of the utmost importance that there should be a center of gravity somewhere, a center there should be a center of gravity somewhere, a center not hostile to any other nation and operating as far as possible through the League of Nations, which can act with decision and authority in dealing with crises which might lead to war if they were not firmly handled at the start. This center of gravity in Europe is the entente cordiale, just as the naval treaty between the United States, Great Britain and Japan amounts to a center of gravity in the effairs of the Pacific in the affairs of the Pacific.

The truth is that despite the differences of opinion and the estrangements which have divided them since 1919 France, the United States, and Great Britain still form the nucleus which is the main support for the ideals of democracy, national freedom, and international co-operation for peace which prevailed in the Great War. Anything which tends to restore confident and friendly rela-tions between these powers is a contribution to world order and peace. Undoubtedly M. Doumergue's successful visit will help to maintain good relations between the

The World's Great Capitals: The Week in Rome

NE of the most interesting historical features of the present moment in Italy is the rehabilitation of Francesco Crispi. A bust of the Sicilian statesman has just been unveiled in the courtyard of the Palazzo della Consulta, now used as the colonial office, and the ceremony, attended by several Cabinet ministers and the high civic authorities, was of an imposing character. Crispi is now very popular with the Fascist Party, mainly because he was the first Italian Imperialist statesman who asserted Italy's right to expansion and laid the foundation of Italy's future empire. Crispi lost his popularity after the Italian defeat of Adowa in 1896, and he spent the last years of his long and varied career in oblivion. Today, however, the Liberal statesman has a street called after him in Rome, tablets recording his memory at the Foreign Office and at Naples, and the new generation is paying tribute to the man whom its fathers had so ungenerously

A few years ago a large slab of marble, measuring over two meters in length and seventy centimeters in width, was found in one of the most ancient sites of Cyrene, the original capital of Cyrenaica, having a long inscription of 144 lines in minute Greek characters. It appears that this marble slab was stolen by one of the inhabitants, who used it as a seat in his house. Fearing that his visitors might see the inscription and make inquiries about it, he took the precaution to place the slab in a position which would hide altogether the inscription. The slab remained in that position for several centuries, but fortunately an Italian scholar came across it, and having removed it from its place was amazed to find that the inscription contained five edicts or proclamations issued by the Emperor

The importance of the find may be gauged by the fact that of the several thousand edicts promulgated by Augustus only one is extant today. The dates of these newly found edicts are 7 B. C., 6 B. C. and 4 B. C. The fact that the edicts are written in the Greek and not in the Latin language is explained by one of the Roman historians. Suetonius, who tells us that Augustus always used Latin for his edicts, but had these translated into for those provinces (as was Cyrenaica) where the latter was the prevailing language. Curiously enough, there are some grammatical mistakes in the inscriptions, and experts are of opinion that they are due either to errors on the part of translators or, as is more probable, of the engraver. If classic literature, however, makes no gain by the find, this is equally interesting to students of history and Roman law.

The text of the five edicts of Augustus have been published, and they give a clear notion of Roman equity in the administration of justice. In the first Augustus informs his Greek subjects of the Province of Cyrene that he had given careful consideration to their complaints that the Roman magistrates had not been impartial in several cases involving Greek-speaking citizens. "I learn that some innocent people have been condemned in this manner," mits the just emperor, who insists that in future the judicial benches in the provinces of Crete and Cyrene should be filled by Greek and Roman judges, in equal

In the second edict, which might perhaps be better called decree, as it contains a decision given by the Emperor in his capacity as the supreme head of the judiciary, Augustus says that he does not reprove one Publius Sestius for having put to prison and dispatched to Rome two Roman citizens who had declared that they could denounce a plot against the Emperor and the State. The prisoners' information proved to be unfounded, but the Emperor praises Sestius for having faithfully accomthe Emperor praises Sestius for naving faithfully accomplished his duty. The last three edicts are less important, and deal with fiscal measures, the procedure to be followed in lawsuits and finally the desire of the Emperor that all his decrees and edicts shall be given the greatest possible publicity in all parts of the Roman Empire. It is rather than the five adjusts containing to many life reserved. strange that these five edicts containing so many different decrees having nothing in common with each other should

have been engraved on the slab. At any rate, they constitute a most important recognition of the fairness with which the central authorities of Imperial Rome expected the local magistrates to administer justice in respect of

The King and Queen of Italy have paid a visit to the French Academy of Rome at the Villa Medici and inaugurated the yearly exhibition of the works of the students. Interest in the French Academy, which had maintained for a long time a pre-eminence among the academic institu-tions of the Italian capital, had somewhat slackened in the last few years. In pre-war days many receptions were held in the famcus villa, which commands one of the best views of Rome, and these gatherings constituted important events in the social and artistic life of the capital. Lack of funds has prevented the present director from following the custom set by his predecessors, but now, chiefly owing to the generosity of François Coty, the perfume facturer, and of Baron Henri de Rothschild wh facturer, and of Baron Henri de Rothschild who pre-sented 120,000 francs to the academy as the beginning of a fund for the resumption of its pre-war activities, the French Academy will once more become the favorite center of Rome's artistic life. This announcement has been re-ceived in Rome with great enthusiasm, both by the Roman public and the foreign colonies.

There has been an exceptional number of exhibitions in Italy this summer, and, as usual, Florence has maintained its reputation of being the most artistic center of Italy. Three different shows were held in the Tuscan city, and the most important was the international exhibition of modern etchings and engravings, which is housed in the Fine Arts Exhibition Palace. There are no less than 4000 Fine Arts Exhibition Palace. There are no less than 4000 exhibits in this show, whose success is largely due to the collaboration of the principal European nations and of the United States, who have not only sent examples of their best artists" works, but made loan collections of the great etchers of the last century. The American section comprises 262 prints, and the hall assigned to the United States is furnished in the colonial style and decorated with seven large pieces of typically American pottery and two samples of Tiffany glass.

Letters to The Christian Science Monitor

An Advocate of Prohibition

To THE CHRISTIAN SCIENCE MONITOR: Perhaps at this time it will be interesting to know what at least one member of the medical profession in Europe thinks regarding alcoholic liquor. The man in question is acknowledged as one of the most prominent physicians in Hungary and is the professor or doctor of physics in the University of Budapest.

His son is an actor, as well as a composer and producer of plays in his own land, and has now for some few years past been in America making motion pictures with one of the large studios in Hollywood. I met this man on a studio lot one day, in my capacity as critic, and in talking about this question of drinking, he told me that his father never had drunk liquor, never had given a prescription for any kind of liquor to a patient, and argued against its use always on the ground that it was bad for anyone.

Hollywood Calif Hollywood, Calif. (Mrs.) F. S. WILSON.

"Give, Don't Lend, to the South"

To THE CHRISTIAN SCIENCE MONITOR: To The Christian Science Monitor:

The Christian Science Monitor is proving that it is a friend to all mankind, and as a Southerner I cannot refrain from expressing my deep gratitude for the accurate and truthful accounts of flood conditions in the South and for the splendid editorials on this subject.

The editorial entitled, "Give, Don't Lend, to the South," carries with it a healing message and should be read by every citizen of the United States.

New Orleans, La, EVALYN H. MARGOTTS.
